

## NITRO GAMING CONTROLLER

The ever-comfortable Nitro Gaming Controller works flawlessly with your PC and devices for Android™ and includes a turbo button for all your button mashing needs!

## 1. It Just Feels Right

Grip the controller in both hands, place your thumbs on the carefully **placed asymmetrical analog joysticks**, and prepare to lose yourself in the exquisiteness of the moment as the screen pixels come to life.

## 2. Getting Along with

### **Windows & Android™**

Free up a USB port, pop it in, and you're all set! Compatible with **Windows**<sup>1</sup> and **Android**<sup>2</sup> devices and has support for **XInput (including vibration)**.

1. Requires a minimum of Windows 7 or above.
2. Use latest update from your Android device manufacturer (Android 4.2 or above). Applies to Android smart phones and TVs.

## 3. Gotta Go Fast

See that turbo button there in the photo? This little guy blasts you into **Turbo Mode**<sup>3</sup> by simulating your controller's input button of choice as though you were constantly pressing it.

3. Turbo is a feature that allows for a button press to be indefinitely until turned off. Pressing or holding down the 'input' button and then pushing 'Turbo' will place the device in 'Turbo Mode.'
