HYPERX FURY

Effortless upgrade, relentless style

Get in the game with HyperX® FURY. Even newbies get up to speed fast, since Fury automatically recognises its host platform and automatically overclocks to the highest frequency published — up to 1866MHz[1] — providing plenty of power for your next deathmatch.

FURY's asymmetric heat spreader design lets you stand out from the "square" crowd. It's available in black, blue, red and— for the first time in the HyperX line —white, with a black PCB. So your rig can reflect your style and you can show it off with pride — without spending a lot, since FURY is affordably priced. It's 100 per cent tested and LAN-ready, plus it's backed by a lifetime warranty and free technical support.

> Auto-overclock up to 1866MHz
> Asymmetric heat spreader for stylish heat dissipation
> Compatible with Intel and AMD platforms

For higher performance upgrades, increased in-game FPS and an overall faster system.

FEATURES/BENEFITS

> **Unique** — tested with all popular brands of motherboards

> **Easy to install** — Plug-and-Play functionality

> **Automatic overclocking** — reach faster speeds and higher capacities just by installing the memory, no adjustments in BIOS needed

> **Reliable** — 100 per cent factory tested

> **Guaranteed** — lifetime warranty, free technical support

SPECIFICATIONS

> **Capacity** up to 8GB (single) and 8GB–16GB (kits)

> **Frequency speed** 1333MHz, 1600MHz, 1866MHz

> **CAS latency** 9-9-9-27 and 10-10-10-30

> **Voltage** 1.5V

> **Operating temperature** 0°C to 85°C

> **Storage temperature** -55°C to 100°C

> **Dimensions** 133.35mm x 32.8mm

> **Compatible** with P55, H67, P67, Z68, Z77, Z87 and H61 Intel chipsets, as well as A75, A87, A88, A89, A78 and E35 AMD chipsets
