

DashDrive Durable UD320

USB OTG (On-the-Go) Flash Drive

USB Flash drives are indispensable for their convenience and speed, but have traditionally been limited to connecting to hosts such as desktop, laptop, and tablet computers. The UD320's microUSB adaptor allows for connection with smartphones and tablets that support USB On-the-Go. When not using the adaptor, the UD320 can also connect to standard USB ports, facilitating data transfer between your device and your computer.
