## FEATURES

### TRI FROZR 3

Stay cool and quiet. MSI's TRI FROZR 3 thermal design enhances heat dissipation all around the graphics card.

### TORX FAN 5.0

Fan blades linked by ring arcs and a fan cowl work together to stabilize and maintain high-pressure airflow.

### Copper Baseplate

Heat from the GPU and memory modules is captured by a copper baseplate and then rapidly transferred to Core Pipes.

### Core Pipe

Precision-machined heat pipes ensure max contact and spread heat along the full length of the heatsink.

### Airflow Control

Sections of different heatsink fins disrupt unwanted airflow harmonics and reduce noise.

### Anti Bending

A die-cast anti-bending plate reinforces the card while thermal pads allow cooling to reach critical component underneath.

### Aluminum Backplate

Thermal pads beneath the sturdy metal backplate provide additional cooling.

Dual BIOS lets you set the priority to full performance in GAMING mode or low noise in SILENT mode.
