

IPS Gaming Monitor Featuring 1ms Motion Blur Reduction

Now gamers can achieve superb gaming graphics through the long-awaited combination of IPS and 1ms Motion Blur Reduction.

Fluid Gaming Motion : AMD FreeSync™ Technology

You can play without a frame loss with AMD FreeSync™ Technology, which eliminates tearing and stuttering that occur from the difference between a graphics card's frame rate and monitor's refresh rate.

A Variety of Gaming Features to Win : Black Stabilizer

While playing shooting games, the Black Stabilizer gives gamers full visibility even in deep-dark scenes. It automatically senses the darkest side and makes it brighter so that you can find the enemies hiding and waiting to attack you in the dark.

A Variety of Gaming Features to Win : Game Mode

With the Game Mode option in Picture Mode, you can customize the picture quality for various gaming genres such as FPS Game1, FPS Game2, RTS Game and Custom Game.

AMD FreeSync™ Technology

Offers smooth gameplay without any stuttering or screen tearing

Dynamic Action Sync

Allows you to attack the enemies faster with less lag time

Black Stabilizer

Avoid snipers hiding in the darkest places and quickly escape situations when the flash explodes

1ms Motion Blur Reduction

Enables clear object display when it requires quick response to different situations in a game, enhancing user's immersive experience

Game Presets in Picture Mode

Customize the picture quality for various gaming genres such as FPS Game1, FPS Game2, RTS Game and Custom (Game).

The Mighty Design of The Monitor

LG's Gaming Monitor has design features that fit well into your gaming station setup without hindering your gaming. The mighty design of the monitor with V-line stand and red color produces a space where the gamer can be immersed deep into the game.
