BenQ LED Monitor BL2411PT

A Win-Win Decision for Mutual Benefits

Designed for business environments, the BenQ BL Series of professional monitors is an essential part of your solutions to minimize total cost of ownership and maximize staff productivity – a win-win decision for the benefits of all.

100% sRGB Color Space Compatibility

For viewing videos from HD camcorders or photos on digital cameras, the monitor reproduces 100% sRGB color to deliver authentic, natural visuals that match the color details of the original source perfectly.

16:10 Wide Aspect Ratio

16:10 widescreen aspect ratio offers 1920x1200 maximum resolution and the ease of viewing documents and working in multiple windows with minimized scrolling and toggling between applications.

Height Adjustment Stand (HAS)

The HAS allows you to find the best viewing angles for personal work or screen sharing with an extensive range of monitor adjustments – height, tilt, pivot, stroke and swivel.

Eye-Protect Sensor

The Eye-Protect Sensor automatically sets the optimal brightness of the monitor screen by detecting the surrounding ambient light. This helps eliminate eyestrain and optimize the viewing condition all day long.

Flicker-Free Backlight

The flicker-free technology replaces conventional LED backlight to effectively eliminate flickering at all brightness levels, reducing eye fatigue caused by flickering backlight.

Reading Mode for an Optimized Reading Experience

Senseye® Reading Mode recreates the comfortable experience of reading actual books by adjusting the color temperature and brightness levels, and balancing the contrast ratio and sharpness, to simulate the look of paperback paper.
