# Introduction

## Purpose

This document describes ordering Cisco physical, virtual, and containerized network security solutions, including:

- Cisco Secure Firewall Threat Defense (FTD).
- Cisco Secure Firewall Adaptive Security Appliance (ASA).
- Cisco Firepower 1000 Series, 4100 Series, and 9300 Series Appliances (which can run either FTD or ASA software, and in case of 9300 could run both ASA and FTD on separate Service Modules).
- Cisco Secure Firewall 200 Series, 1200 Series, 3100 Series, 4200 Series, and 6100 Series Appliances (which can run either FTD or ASA software).

In addition, this guide details the process of enabling extended logging and analytics for both FTD and ASA platforms as well as Cisco ISE Passive Identity Connector (ISE-PIC) for identity integration into FTD.

This guide will help you make sure that the right quantities and types of parts are selected to reduce the risk of order rejection.

## Audience

This guide is intended for Cisco Sales Teams and Partners – and that includes Distributors.

## Scope

This document covers orderability for the following products, associated licenses and options:

- Cisco Secure Firewall (both Firewall Threat Defense and ASA software).
- Hardware appliances (Cisco Firepower or Cisco Secure Firewall ).
- Virtualized and containerized appliances (FTDv and ASA v).

## Firewall management solutions

- **Cisco Secure Firewall Management Center:** provides complete and unified management over firewalls, application control, intrusion prevention, URL filtering, and advanced malware protection. Quickly and easily go from managing a firewall to controlling applications to investigating and remediating malware outbreaks. Firewall Management Center is available in all form factors – physical appliance, virtual appliance, public cloud and cloud-delivered (software as a service model).
- **Cisco Security Cloud Control** helps you establish and maintain a security posture by managing security policies across Cisco security devices. Cisco Security Cloud Control also incorporates the cloud-delivered version of Secure Firewall Management Center. As a cloud service, it is an always-available, highly reliable, highly scalable, multitenant platform.

Cisco Security Cloud Control provides management of security policy, objects and configuration for Cisco Adaptive Security Appliance and Cisco Secure Firewall Threat Defense (formerly Next-Generation Firewalls, or NGFW). Also supported are the Meraki MX Firewalls and AWS Security Groups for pure policy and object management. Configuration management for these platforms is still available through their native user interface.

**Note:** For the Cisco Security Cloud Control Ordering Guide, please click [here](#).

- **Cisco Security Manager software** is an on-premises centralized management platform for Cisco Adaptive Security Appliances (ASA), enabling consistent policy enforcement, troubleshooting, and summarized reports.

## Optional Software

- Cisco Secure DDoS Protection (formerly Radware Virtual DefensePro DDoS Mitigation).
- Cisco Secure Client (formerly Cisco AnyConnect Secure Mobility Client).

## Support

- Cisco Smart Net Total Care appliance support services.
- Cisco Software Application Support plus Upgrades (SASU).

**Note:** Any order for a service will be subject to the detailed terms and conditions presented in this guide.

## Selecting the Appropriate Management Solution

Several management solutions are available to manage Cisco Secure Firewalls. Use these guidelines to choose the best or ask a Cisco Security expert for advice.

Choosing the right management solution is tied to a few factors:

- The software image you select, either Firewall Threat Defense (FTD) or ASA software image.
- Willingness to use a cloud-based solution for management.
- Need for specific features or environment scale.

Local managers are included with both software options for single firewall deployments:

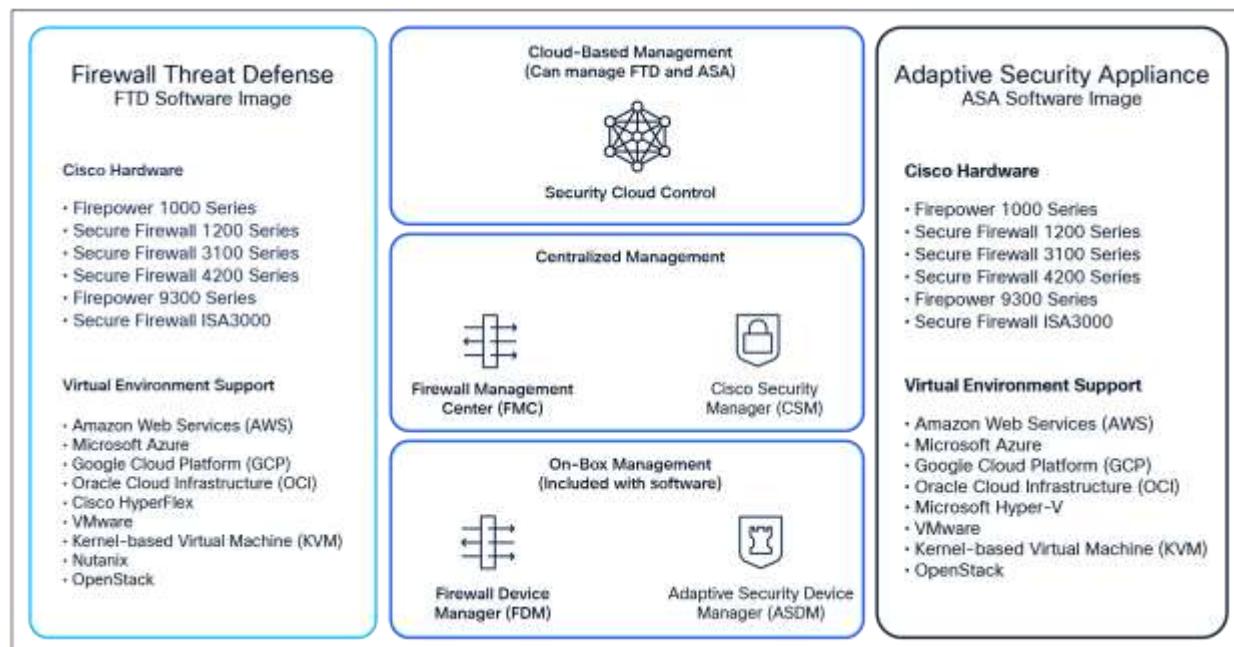

- ASDM is included with the ASA software image.
- Firewall Device Manager (FDM) is included with the Firewall Threat Defense software Image for all supported appliance models (Cisco Firepower 1000 Series, 4100 Series and 9300 Series; Cisco Secure Firewall 1200 Series, 200 Series and 3100 Series).

The Cisco Secure Firewall Threat Defense software image enables centralized management with either an on-premises, virtual or cloud-based manager - Cisco Secure Firewall Management Center.

Cisco Security Cloud Control unifies management across Cisco security solutions and incorporates the cloud-delivered version of Secure Firewall Management Center. This makes Cisco Security Cloud Control the best option for customers who want to use a cloud-based solution for the management of ASAs, FTDs or a mix of ASAs and FTDs from a single pane of glass.

Devices running the ASA software can be managed centrally by the Cisco Security Manager (on-premises) or Cisco Security Cloud Control (Cloud).

The following table can help guide you in which manager to select for your firewall deployment:

**Figure 1.**  
Manager selection matrix

## Licensing

Smart Licensing is Cisco's licensing system. It enables customers to easily move licenses between similar systems in their organization, overcoming limitations associated with previous device-locked Product Authorization Key (PAK)-based licenses.

End customers must create a Smart Licensing account on Cisco's Smart Software Manager portal before ordering the Cisco Secure Firewall Threat Defense software or certain ASA appliances. Alternatively, Cisco or a partner can help create the Smart Licensing account on behalf of the end customer. The Smart Software Manager portal is available for customers to manage the efficient use of purchased smart licenses. When the order is placed, all ordered licenses are added to the customer's Smart Licensing account.

**Table 1.** Product licensing by product type

Product	Licensing
<b>Cisco ASA Virtual appliances</b>	Cisco Smart Licensing
<b>Cisco Secure Firewall Threat Defense Virtual appliances</b>	Cisco Smart Licensing
<b>Cisco Secure DDOS Protection (Radware vDefensePro) on Cisco Firepower 9300 and 4100 Series appliances</b>	Supplied by Radware
<b>Cisco Secure Firewall Management Center</b>	None required

Product	Licensing
<b>Cisco Secure Firewall Management Center Virtual Appliance</b>	Cisco Smart Licensing
<b>Cisco Security Manager</b>	Cisco PAK Licensing
<b>Cisco Security Analytics and Logging</b>	Either Cisco Smart Licensing or Classic License
<b>Cisco ISE Passive Identity Connector (ISE-PIC)</b>	Either Cisco Smart Licensing or Classic License

With the Cisco Smart License Manager, the customer can connect devices to the Smart Software Manager portal, so purchased licenses can be consumed as needed. These licenses can be relinquished back to the portal when a device is powered down or a user is finished using the license. With [Smart Software Licensing](#), customers can easily check in and check out licenses to use on different platforms. Licenses are no longer locked to a specific platform.

A Smart Account can be created from [Cisco Software Central](#). For more information on setting up a Smart Account, please refer to this [Smart Licensing Deployment Guide](#).

### ASA and Firewall Threat Defense License Terminology

This guide consistently uses the license terminology used in the Cisco Commerce tool. As of ASA 9.19.1 and FTD 7.3, new licensing terminology appears in the user interfaces of the management platforms. The differences are only in naming and are not different licenses per se.

**Table 3.** License terminology differences between Cisco Commerce and the user interfaces of the management platforms

License Name Used in the Cisco Commerce tool	License Name Seen in User Interface
Base	Essentials
Threat	IPS
Malware	Malware Defense
URL License	URL

## **Cisco Secure DDoS Protection (Radware vDefensePro) Licensing**

Licensing of the vDP and Vision will be administered directly by Radware. Once the order is shipped, Radware will send an email to the customer with their serial numbers. Please note the address of the person on the customer order who will receive the email. These serial numbers will be needed along with the MAC address for either vDP and/or Vision after installation. If the email with the serial numbers cannot be found, please open a TAC case to get them reissued. For detailed licensing instructions, please refer to [Radware License Generator](#).

## **High Availability Pair Licensing**

Cisco requires two (2) subscriptions for a High Availability (HA) pair of appliances running Firewall Threat Defense software image, which is configured for active-passive operation. The models available with this optional configuration include:

- Cisco Firepower 1000 Series
- Cisco Secure Firewall 200 Series
- Cisco Secure Firewall 1200 Series
- Cisco Secure Firewall 3100 Series
- Cisco Firepower 4100 Series
- Cisco Secure Firewall 4200 Series
- Cisco Secure Firewall 6100 Series
- Cisco Firepower 9300 Series
- Cisco Secure Firewall Threat Defense Virtual appliances (except Public Cloud)
- Cisco ASA Virtual appliances (except Public Cloud)

We now offer specially configured bundle stock keeping units (SKUs) that enable the purchase of a High Availability pair of physical appliances and software subscriptions that includes 50% discounted pricing for the second software subscription in the two-appliance bundle.

The bundle consists of:

- Two (2) identically configured hardware appliances
- Two (2) identical software subscriptions

A 50% discount will be automatically applied to the second software subscription in the bundle. See the specific model section in this document for the appropriate bundle PID.

## **Renewing HA Bundle Software Subscriptions**

The 50% pricing discount also applies to HA bundles at time of renewal.

## Cisco Secure Client Licensing

Cisco Secure Client (formerly AnyConnect Plus, Apex, and VPN Only) licenses are required to use the Remote Access VPN (RA VPN) functions on all firewalls (physical and virtual) running the Secure Firewall ASA or Secure Firewall Threat Defense code base.

For information on purchasing Cisco Secure Client licenses and sharing the licenses with your Smart Account, please see the [Cisco Secure Client Ordering Guide](#).

Instructions can also be found in the [Cisco Secure Client License FAQ](#).

## Service and Support Offerings

### Software Application Support Plus Upgrades (SASU)

Cisco Secure Firewall Threat Defense software, ASA firewall, and Cisco Secure Firewall Management Center security licenses include software subscription support. SASU is essential to keeping your business-critical applications available, highly secure, and operating at optimal performance. For the term of your software subscription licenses, you will receive timely, uninterrupted access to the latest software updates and major upgrade releases, which may contain significant architectural changes and new features and functions. With software subscription support, you will have the latest software working to protect your business. You will also have access to a wide range of online tools and communities that can help you solve problems quickly, maintain business continuity, improve your competitiveness, and make the most of limited resources through increased productivity.

This support entitles customers to the services listed here for the full term of the purchased software subscription:

- Software updates and major upgrades, to keep applications performing optimally with the most current feature set.
- Access to the Cisco Technical Assistance Center (TAC), which provides fast, specialized support.
- Online tool building, to expand in-house expertise and boost business agility.
- Collaborative learning, to provide additional knowledge and training opportunities.

No additional products or fees are required to receive these services with a software subscription.

Cisco SASU includes:

- Registered access to Cisco.com.
- 24-hour access to the Cisco TAC and Cisco software specialists.
- Maintenance and minor software release updates.
- Major software upgrade releases.

Please refer to the following link for more detailed information regarding Cisco SASU:

[https://www.cisco.com/en/US/services/ps2827/ps2993/services\\_at\\_a\\_glance\\_sas\\_sasu.pdf](https://www.cisco.com/en/US/services/ps2827/ps2993/services_at_a_glance_sas_sasu.pdf).

## Cisco Smart Net Total Care Service

Customers require a Cisco Smart Net Total Care support contract with each appliance to download application signature updates. The Smart Net Total Care Service gives customers access to an abundance of Cisco support tools and expertise, providing them with greater network availability and performance while reducing operating costs. Technical service is required to be attached at the point of the product sale so that customers get the necessary support and entitlement and the best possible return on investment. When ordering Threat Defense software on select ASA hardware, the Management Center, the appropriate Smart Net Total Care service items are automatically added to your quote.

The Cisco Smart Net Total Care Service provides:

- Global 24-hour access to the Cisco TAC.
- Access to the online knowledge base, communities, and tools.
- Current hardware replacement option: next business day, where available.
- Operating system software updates.
- Smart, proactive diagnostics and real-time alerts on devices enabled with Cisco Smart Call Home.

Please refer to the following link for more detailed information regarding Cisco Smart Net Total Care Service: <https://www.cisco.com/c/en/us/support/services/smart-net-total-care/index.html>.

## Cisco Advanced Services

The Cisco Global Security Solutions team provides comprehensive assessment, design, deployment, and migration assistance through the Cisco Advanced Services Transaction (AS-T) model, which involves the use of a Statement of Work (SOW). These Cisco AS-T offers are custom scoped and priced, and partners need to engage a Cisco Services account manager to purchase them.

Cisco Security Plan and Build Services help customers develop and deploy a comprehensive security strategy they can rely on to deliver the industry's most comprehensive advanced threat protection solution. This service incorporates a best practice review, deployment, and tune-up to help ensure that the system is alerting properly.

Cisco Security Migration Services help customers move from existing Cisco Source fire or competitive environments. Cisco performs an analysis of the current environment, develops a migration plan, tests the plan in a lab, and performs the migration in the production environment.

To order the customized Cisco Security Plan and Build Services and Migration Services, use the Cisco AS-T part numbers in the table below.

**Table 4.** Cisco AS-T ordering information

Part numbers	Description	Price (US\$)
AS-SEC-CNSLT (-A, -L)	Cisco Security Plan and Build Services	Custom priced
AS-SEC-CNSLT (-A, -L)	Cisco Security Migration Services	Custom priced

## Cisco Technical Services

Cisco Technical Services for Cisco products can be quoted and ordered in Cisco tools, including the Cisco Service Contract Center (SCC) and Cisco Commerce (CCW). Tool use varies depending on the service offer and partner type and whether the service is attached at the time of product purchase.

## Partner Supported Services (PSS)

Customers who choose to purchase Partner Supported Services (PSS) from an authorized Cisco partner are also entitled to download application signature updates. For more details, visit <https://www.cisco.com/go/partnerservices> and the [Partner Support Service Global Ordering Guide for Cisco 1-Tier Partners](#).

## Cisco Talos Incident Response

Cisco Talos Incident Response (CTIR) provides a full suite of proactive and emergency services to help you prepare, respond and recover from a cyber security breach. CTIR enables 24-hour emergency response capabilities and direct access to Cisco Talos, the world's largest threat intelligence and research group.

You can order and transact CTIR while ordering specific Cisco Firepower 4K and 9K Series master bundles. This will provide you with yet another option to create a stronger security posture and stay protected in case of a security breach. The CTIR PID will be auto attached based on product order size. **The auto-attached SKU can be removed and is not mandatory.**

**Table 5.** CTIR option available in Cisco Firepower master bundles

## SKUs and ordering guidance for Cisco Secure Firewall Appliances

### Introduction

**Scope:** This section describes the pricing and ordering for the following products:

- Cisco Secure Firewall 200 Series
- Cisco Firepower 1000 Series
- Cisco Secure Firewall 1200 Series
- Cisco Secure Firewall 3100 Series
- Cisco Firepower 4100 Series
- Cisco Secure Firewall 4200 series
- Cisco Secure Firewall 6100 series
- Cisco Firepower 9300 Series

## About the Cisco Secure Firewall Appliances

Cisco firewall appliances, when deployed as Layer 2-7 firewall sensors, use the Cisco Secure Firewall Threat Defense software image. The Cisco Secure Firewall Management Center provides unified management for both Next Generation Firewall and dedicated IPS. The on-device Firewall Device Manager is also available with Secure Firewall Threat Defense software. Alternatively, the Cisco Secure Firewall with Adaptive Security Appliance (ASA) software image is also supported on the Cisco Firepower and Secure Firewall platforms. When running the ASA software image, the ADSM on-device manager is available. Cisco Firepower 4100 and 9300 series appliances are also available with Cisco Secure DDoS Protection. Alternatively, all Secure Firewalls are available with cloud-based Cisco Secure DDoS Protection.

### Cisco Secure Firewall 200 Series Appliances

The Cisco Secure Firewall 200 Series redefines security for the distributed enterprise, delivering next-generation firewall capabilities tailored for branch offices, retail, and other critical edge sites. With this, you can experience robust, cost-effective protection and simplified management in a compact form factor, empowering secure and optimized connectivity at every network edge.

### Cisco Firepower 1000 Series Appliances

The Cisco Firepower 1000 Series is a family of threat-focused security appliances for branch, Distributed Enterprise and Internet Edge deployments. The 1000 Series hardware delivers superior threat defense, with greater throughput than earlier models such as the ASA-5506-X, ASA-5508-X and ASA-5516-X. The 1000 Series is available with ASA and FTD software images.

## Cisco Secure Firewall 1200 Series Appliances

The Cisco Secure Firewall 1200 Series is a family of threat-focused security appliances for the distributed enterprise. It extends high levels of inspection to branch locations to enable direct internet connectivity and SD-WAN.

The 1200 Series includes three compact models (1210CE, 1210CP, 1220CX) that can be installed in a variety of configurations (wall-mounted, on a desktop, rack-mounted, in a suitable cabinet). The family also includes three 1U rack-mount models (1230, 1240, 1250) for larger branches.

## Cisco Secure Firewall 3100 Series Appliances

The Cisco Secure Firewall 3100 Series is a family of threat-focused security appliances. The 3100 Series addresses emerging hybrid mid-market and high-end use cases from the Internet edge to the data center, providing superior performance at a highly competitive price point.

## Chassis Overview: Cisco Secure Firewall 3100 Series

<b>Front</b> 8x 1000BASE-T ports 8x SFP+ 10Gbps ports (3105, 3110, 3120), or 8x SFP28 25Gbps ports (3130, 3140) 2x SSD bay (field-replaceable, 1 SSD included) 1x NetMod bay for FPR3K-XNM Gen2 modules 1x Management Ethernet port (SFP+ 10Gbps) Console (Cisco RJ45 serial) USB 2.0	
<b>Rear</b> 2x power supply bays (1 included) 2x fan module bays (2 included)	

## Cisco Firepower 4100 Series Appliances

The Cisco Firepower 4100 Series comprises four threat-focused security appliances. The 4100 Series addresses use cases from the Internet edge to the data center. The 4100 Series hardware delivers superior threat defense, at faster speeds, with a smaller footprint. Also, the Cisco Firepower 4100 Series enables an upgrade path, on the customer's timeline, to the Cisco Secure Firewall Threat Defense software, even if the customer chooses the ASA image in the immediate term.

### Chassis Overview: Cisco Firepower 4100 Series

## Cisco Secure Firewall 4200 Series Appliances

The Cisco Secure Firewall 4200 Series is a high-end firewall designed to meet the security requirements of large enterprises, datacenters, and service providers. It is available in three different performance models, offering superior threat defense within a compact 1 RU form factor. Key features and benefits of the appliance include:

- Cryptographic acceleration architecture preserves performance with SSL and VPN decryption.
- Save space and energy with 1RU form factor.
- Future-proof your investment with 16x node cluster.
- Flexibility of 2x interface module bays for additional interface support.
- Customize and future proof investment up to 400G interfaces.
- 2x SSD for event storage and malware analysis.
- Uptime/resilience with dual management interfaces.
- Fail-to-wire network modules, further enhancing its reliability and fault tolerance.

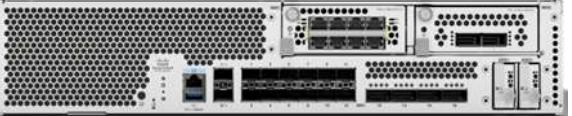

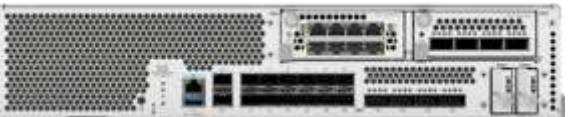

These platforms can be deployed in both firewall and dedicated IPS modes, providing versatile deployment options. For inline sets and passive interfaces, the 4200 Series supports Q-in-Q (stacked VLAN) with the ability to handle up to two 802.1Q headers in a packet.

## Cisco Secure Firewall 6100 Series Appliances

The Cisco Secure Firewall 6100 Series is an AI-ready, ultra-high-end firewall engineered to deliver exceptional throughput and threat inspection in a 2-rack-unit (RU) form factor. Optimized for high-performing data center and telecommunications mobility infrastructure, its multi-core architecture and dedicated cryptographic modules provide industry-leading performance for both next-generation firewalling and encrypted traffic inspection. The 6100 Series supports both Firewall Threat Defense (FTD) and Adaptive Security Appliance (ASA) software, offering a versatile and powerful security solution.

## Cisco Firepower 9300 Series Appliances

The Cisco Firepower 9300 is a modular, scalable, carrier-grade appliance, available in Network Equipment Building System (NEBS) configurations, designed for service providers, data centers, campuses, supercomputing centers, high-frequency trading environments, and other environments requiring both low latency and the greatest throughput. In the service provider context, it is specifically designed for carriers, content providers, and cloud service providers to protect the Cisco Evolved Programmable Network, Cisco Evolved Services platform, and Cisco Application Centric Infrastructure architectures. (For more information, please see [Cisco service provider security solutions](#).)

Tightly integrating threat-centric security services from Cisco and its partners, the 9300 appliance lowers integration costs and supports the full realization of highly secure, open, and programmable networks. In addition to providing class-leading security services, it offers low (less than 5-microsecond) latency, throughput for single flows exceeding 30 Gbps, and class-leading performance and port density on a per-rack-unit basis.

### Chassis Overview: Cisco Firepower 9300

Supervisor module (included with the 9300 chassis): provides overall chassis management and network interaction

- Network interface allocation and security module connectivity (960-Gbps internal fabric)

2 x Network Module bays

- 10, 40, and 100 Gigabit Ethernet network connectivity options

Security Modules: modular computing capability expands as your needs grow. Pictured are the three bays for Security Modules. A minimum of one must be ordered for standard operation.

With three SM-56 Security Modules, Cisco Firepower 9300 features up to:

- 190 Gbps of aggregate performance for NGFW inspection with FTD software use case; up to 0.87 Tbps aggregate performance when 16 service modules are clustered
- 235 Gbps of aggregate performance for stateful inspection with ASA software use case; up to 1 Tbps aggregate performance when 16 service modules are clustered

Also available: NEBS-compliant modules.

Pictured at right is the rear view of the Cisco Firepower 9300. Note that it is available with dual AC, DC, or HVDC power supplies. Also, the fan assemblies and power supplies are user replaceable.

Reminder: The Cisco Firepower 9300 is available with 10, 40, and 100 Gigabit Ethernet Network Modules.

## Special Guidelines for Quoting the Cisco Firepower 9300

Cisco Firepower 9300 ordering is highly customizable, and options are offered separately. You'll nevertheless find the ordering process straightforward.

The following table shows the four core components of a Cisco Firepower 9300 order.

**Table 6.** Components of a Cisco Firepower 9300 order

Common hardware	Optional modules	Software licenses	Services and subscriptions
<p><b>Base Cisco Firepower 9300 Security Appliances include:</b></p> <ul style="list-style-type: none"><li>• Chassis (1)</li><li>• Supervisor (1)</li><li>• Fans (4)</li><li>• Power supplies (2 – AC, DC or HVDC)</li></ul>	<p>Choice of Security Modules—up to three bays per chassis:</p> <ul style="list-style-type: none"><li>• SM-40, 48, 56</li></ul> <p>Choice of network modules – two bays per chassis:</p> <ul style="list-style-type: none"><li>• 1/10/40/100Gbps options</li></ul>	<p>Smart Licenses</p> <p>ASA:</p> <ul style="list-style-type: none"><li>• ASA Standard</li><li>• Carrier</li><li>• Strong Encryption</li><li>• Security Contexts</li></ul> <p>Cisco Secure Firewall Threat Defense:</p> <ul style="list-style-type: none"><li>• Threat Base (includes Application Visibility and Control – AVC)</li><li>• Threat license and subscription terms (see next column)</li></ul> <p>Third-party software:</p> <ul style="list-style-type: none"><li>• Cisco Secure DDOS Protection (Radware Virtual DefensePro)</li></ul>	<p>Smart Net Total Care Service</p> <p>Cisco Secure Firewall Threat Defense Subscriptions (1, 3, or 5 year terms)</p> <ul style="list-style-type: none"><li>• Threat (includes Security Intelligence, IPS)</li><li>• Malware defense</li><li>• URL</li></ul>

**Common hardware** is bundled. However, your customer may wish to order extra fans and power supplies with the initial order, as these are hot-swappable, user-replaceable items. Please note that every order will require at least one, and up to three, **Security Modules**. **Network Modules** are also ordered separately.

Regarding **software licenses**, keep in mind that the Cisco Firepower 9300 runs either the ASA software image or the Cisco Secure Firewall Threat Defense image. Also, please note that the Encryption license is export controlled. It is available for most markets, to customers in countries where U.S. export control permits the export of strong cryptography. For more information, visit [export compliance details](#).

In the **third-party software** category, Cisco Secure DDOS Protection (Radware Virtual DefensePro DDoS-mitigation capability) has been tightly integrated into the Cisco Firepower 9300 and 4100 Series with ASA software, is orderable from and supported directly by Cisco.

### ASA Licensing for Cisco Firepower Appliances

The 9300 appliance, 6100 Series, 4200 Series, 4100 Series, 3100 Series, 1200 Series, 1000 Series and 200 Series are available with either the Cisco Secure Firewall Threat Defense (FTD) image or the Cisco Adaptive Security Appliance (ASA) image. Cisco Firepower appliances with ASA are available through Smart Licenses. They include a Base license and up to three optional licenses (Encryption, Security Contexts, and Carrier).

### Base License (Free)

**L-F9K-ASA(=)** (for the Cisco Firepower 9300), **L-FPR4100-ASA(=)** (for the Cisco Firepower 4100 Series models), **L-FPR3100-ASA(=)** (for the Cisco Secure Firewall 3100 Series models), or **L-FPR1000-ASA(=)** (for the Cisco Firepower 1000 Series models) , **FPR42xx-BSE** (for the Cisco Secure Firewall 4200 Series models), **CSF220-BSE / L-CSF220-BSE=** (for the Cisco Secure Firewall 200 Series models) and **CSF61xx-BSE / L-CSF61xx-BSE=** (for the Cisco Secure Firewall 6100 Series models): Licensing on the ASA is simplified for the Cisco Firepower appliances. More than 50 ASA feature licenses are condensed into a single license. This license also includes the following security contexts by default: 10 security contexts for Firepower 9300, 10 security contexts for Firepower 4100 Series, 10 security contexts for Secure Firewall 4200, 2 security contexts for Secure Firewall 3100 Series, 2 security contexts for Firepower 1000 Series and 2 security contexts for Secure Firewall 6100.

### Encryption License (Free)

**L-F9K-ASA-ENCR-K9(=)** (for the Cisco Firepower 9300), **L-FPR4K-ENC-K9(=)** (for Cisco Firepower 4100 Series models), **L-FPR3K-ENC-K9(=)** (for Cisco Secure Firewall 3100 Series models) or **L-FPR1K-ENC-K9(=)** (for Cisco Firepower 1000 Series models) , **FPR4200-ENC-K9/ L-FPR4200-ENC-K9=** (for Cisco Secure Firewall 4200 Series models), **CSF6100-ENC-K9/ L-CSF6100-ENC-K9=** (for Cisco Secure Firewall 6100 Series models) and **CSF200-ENC-K9/ L-CSF200-ENC-K9=** (for Cisco Secure Firewall 200 Series models): This license provides for strong encryption (K9) on the platform. The U.S. export of strong cryptography is not available to export-restricted regions. Cisco solutions and products with strong encryption may not be delivered to individuals or entities on the U.S. government's list of denied or restricted parties.

Please review the U.S. Bureau of Industry and Security's list of parties of concern at:

<https://www.bis.doc.gov/index.php/policy-guidance/lists-of-parties-of-concern>.

### Additional Security Contexts (Paid)

**L-F9K-ASA-SC-10(=)** (for the Cisco Firepower 9300), **L-FPR4K-ASASC-10(=)** (for the Cisco Firepower 4100 Series models), **L-FPR3K-ASASC-10(=)** (for the Cisco Secure Firewall 3100 Series models), **FPR4200-ASASC-10/ L-FPR4200-ASASC10=** (for the Cisco Secure Firewall 4200 Series models), **CSF6100-ASASC-10/ L-CSF6100-ASASC10=** (for the Cisco Secure Firewall 6100 Series models): This license adds 10 security contexts to an ASA instance on the 9300 appliance, 4100 appliance, 4200 appliance, 3100 appliance respectively.

### Carrier License Option (Paid)

**L-F9K-ASA-CAR(=)** (for the Cisco Firepower 9300) or **L-FP4K-ASA-CAR=** (for Cisco Firepower 4100 Series models), **FPR42K-ASA-CAR/L-FPR42-ASA-CAR=** (for Cisco Secure Firewall 4200 Series models), or **L-FPR3K-ASA-CAR=** (for Cisco Secure Firewall 3100 Series models), **CSF6100-ASA-CAR/ L-CSF6100-ASA-CAR=** (for Cisco Secure Firewall 6100 Series models): This license covers carrier feature enablement that allows for inspection of Diameter, GTP/GPRS and SCTP protocols

## Cisco Secure Firewall Threat Defense Licensing for Cisco Firepower Appliances

Figure 2 provided for general reference only, shows the typical order flow. Start with the primary bundle part numbers and the software image (ASA or Firewall Threat Defense), and then, in the case of the example, associated Cisco Secure Firewall Threat Defense-related licenses and subscriptions for functionality like Security Intelligence and IPS (“T”), Advanced Malware Protection (“M”), and URL Filtering (“C”). This example concludes with ordering the associated virtualized Cisco Secure Firewall Management Center. Note that Cisco Secure Firewall Threat Defense ships standard with the option to activate a 3-month trial license without activation of a Smart License account.

The screenshot shows a software interface for configuring a bundle. At the top, it displays the bundle configuration name as 'FPR9K-FTD-BUN' and a maximum estimated lead time of 112 days. A note indicates that 'L-FPR9K-48T-TMC' has been added to the 'SUBSCRIPTIONS(SM-48)' category. The interface includes a 'Cancel' and 'Done' button. On the left, a sidebar lists available components: BASIC HARDWARE, SECURITY MODULE, SUBSCRIPTIONS(SM-48), SUBSCRIPTIONS(SM-48), SUBSCRIPTIONS(SM-56), and SOFTWARE. The SOFTWARE section shows a selected item, 'L-FPR9K-TD-BASE', with a note that a license is required to run Firepower Threat Defense on Firepower 9000. The estimated lead time is 8 days. The main area is divided into sections for different component types, each with a table for selecting products and their details. The sections include:

- BASIC HARDWARE > 1 Selected (Min 1, Max 1):** Shows one item, 'FPR-CH-9300-DG', with an 'INVALID' status.
- SECURITY MODULE > 1 Selected (Min 1, Max 3):** Shows one item, 'FPR9K-SM-48', with a 'VALID' status.
- SUBSCRIPTIONS(SM-48) > 0 Selected (Min 0, Max 3):** Shows one item, 'L-FPR9K-48T-TMC', with a 'VALID' status.
- SUBSCRIPTIONS(SM-56) > 0 Selected (Min 0, Max 3):** Shows one item, 'L-FPR9K-TD-BASE', with a 'VALID' status.

Typical order flow

## Ordering Steps for Cisco Firepower 9300, FTD-Based Cisco Firepower 9300

Start with one of the following FTD Bundle SKUs in CCW, example shown above is FPR9K-FTD-BUN.

Select Hardware Options and Quantity.

Chassis Type – AC, DC, or HVDC.

Chassis Options including Netmod, Sup, SFPs, power cables.

Security Module Quantity – up to 3 per chassis.

Select Subscriptions – T=, URL=, AMP=, TC=, TM=, TMC=.

Select Term – 1, 3 or 5 years.

Select Base Software License for each security module.

You can add additional features to the system. For example, starting with FTD release 7.3, you can add Carrier License to Firepower 3100 (**FPR3K-FTD-CAR**), Firepower 4100 (**FPR4K-FTD-CAR**), Firepower 9300 (**FPR9K-FTD-CAR**) and FTD virtual (**FTDV-CAR**) configurations. This license covers inspection of Diameter, GTP/GPRS and SCTP protocols.

Save and exit bundle configuration and select quantity of each bundle configured. Each bundle corresponds to a single-chassis configuration. After saving the configuration, you can change quantity for more than one chassis with the same configuration

### Cisco ISE Passive Identity Connector (ISE-PIC)

Due to End-of-Life for the Cisco Firepower User Agent, FTD requires the use of either Cisco Identity Services Engine (ISE) or Cisco ISE Passive Identity Connector (ISE-PIC) to control policy based on Active Directory user. This section describes the procedure for ordering Cisco ISE Passive Identity Connector (ISE-PIC). For information on how to order of Cisco Identity Services Engine (ISE) please see the [Cisco ISE Licensing Guide](#).

The Cisco Identity Services Engine (ISE) Passive Identity Connector centralizes, consolidates, and distributes identity information, including IP addresses, MAC addresses, and usernames. It centralizes the authentication information, becoming the single source of truth for its subscribers. Using the Cisco Platform Exchange Grid (pxGrid), the Cisco ISE Passive Identity Connector can support up to 20 subscribers. Further details on the capabilities of the Cisco ISE Passive Identity Connector (ISE-PIC) can be found on the [Cisco ISE Passive Identity Connector Data Sheet](#).

**Table 7.** Cisco ISE-PIC ordering information

SKU	Description	Services and subscriptions
<b>R-ISE-PIC-VM-K9=</b>	ISE Passive Identity Connector 3,000 session Virtual Machine	CON-ECMU-RISEPIVM
<b>L-ISE-PIC-UPG=</b>	ISE Passive Identity Connector – Upgrade to maximum 300,000 sessions	CON-ECMU-LISEPUPG

**Note:** You may be entitled to ISE-PIC at no cost if you have a qualifying FMC and valid support contract.

For more information see [End-of-Life and End-of-Support for the Cisco Firepower User Agent](#).

## Cisco Security Analytics and Logging

This section describes the procedure to enable extended logging and analytics by ordering Cisco Security Analytics and Logging as part of your firewall purchase. The detail ordering process is described [here](#).

The Security Analytics and Logging offer has two distinct delivery mechanisms:

- **Security Analytics and Logging (SaaS):** A cloud-delivered, Software-as-a-Service (SaaS) offering with a Cloud Data Store.
- **Security Analytics and Logging (On prem):** An on-premises appliance-based software application with an On-premises Data Store.

### Discounted Bundling When Attaching Firewall Subscriptions via CCW

- Begin by navigating to the firewall model to be ordered (FPR1150-NGFW-K9, for example).
- Make your software choice under the “Subscriptions” category at the top (wherever present) and navigate to the “Extended Logging and Analytics” category below.
- You are presented with two options to the right: “On-Premises Data Store” or “Cloud Data Store.” Only one option can be selected per firewall being ordered, with either the same or different subscription term as the firewall subscription.
- The “Cloud Data Store” option allows selection of either the Logging License, **SEC-LOG-CL**, or the “Logging Analytics License,” **SEC-ANYL-CL**. Only one option needs to be chosen, as the Logging License is nested under Logging Analytics. Both Cloud licenses include access to a Cisco Security Cloud Control tenant for log viewing only, which can be requisitioned using the link here: <https://www.ciscofeedback.vovici.com/se/6A5348A75C69D114>.
- Choosing either of the two data store options will attach a default logging volume in GB/day for that firewall model, based on expected daily volume per the [Logging Volume Estimator Tool](#). Logging rate comes with a default retention of 90 days rolling storage for Cloud Logging.
- The last three optional licenses are Data Retention extensions, which extend log retention to 1, 2, or 3 years in the cloud.

The screenshot shows the Cisco Commerce Configuration (CCW) software interface. At the top, there are navigation links: Open a Case, Training, CCW Support Community, and Cisco Feature Navigator. The user is currently viewing the configuration for a FPR1150-NGFW-K9 model. The configuration summary shows the selected country/region as Not Required. The Subscriptions section lists the FPR1150T-TMC license (Qty: 1, Price: 0.00) and the L-FPR1150T-TMC-3Y 3G MME license (Qty: 1, Price: 0.00). The Extended Logging and Analytics section includes a Power Cables category and a Software Version category (SF-F1K-TD6.6-K9, Qty: 1, Price: 0.00). The Included Items section lists the FPR1000-ASA license (Qty: 1, Price: 0.00). The Subtotal is 0.00 and the Estimated Lead Time is 120 days. On the right, a detailed list of optional licenses for the Cloud Data Store is shown, including the SEC-LOG-CL license (Cloud Logging with 90 days storage - GB/day, Qty: 16, Price: 0.00), SEC-ANYL-CL (Cloud Logging Analytics with 90 days storage - GB/day, Qty: 16, Price: 0.00), SEC-CL-DR-1Y (Data Retention 1 Year Extension Pack - GB/day, Qty: 16, Price: 0.00), SEC-CL-DR-2Y (Data Retention 2 Year Extension Pack - GB/day, Qty: 16, Price: 0.00), and SEC-CL-DR-3Y (Data Retention 3 Year Extension Pack - GB/day, Qty: 16, Price: 0.00). A warning message at the top right states: "The item, SEC-LOG-CL, has been successfully removed." The interface is in English and shows prices in US Dollars (USD).

g. If SAL (Op) is desired, the “On-Premises Data Store” tab allows choosing the base Logging and Troubleshooting license, **SEC-LOG-OP**. This license supports remote query by FMC and is hosted on SNA appliance(s), as detailed in section 1.2.2.

h. The process for bundling extended logging and analytics for Firewall FPR9K series devices is different, as the Security Modules (SM) configured as part of order determines the Logging quantity required. The Logging quantities needed are 190, 225 and 257 GBs/day for each SM-40, SM-48 and SM-56 respectively, and this quantity needs to be entered manually for the extended logging and analytics licenses. The system will display a warning of the logging quantities required for each Security Module, as shown below:

## Expected Retention Period

The expected retention period for the SAL service under average deployment conditions (see note below table) is as follows:

**Table 8.** Retention Matrix

Sustained Firewall Events per Second (eps)	Equivalent GB/day	On-premises					Cloud		Direct-to Cloud
		Single node* 1TB Storage	Single node 2TB Storage	Single node 4TB Storage	Multinode** Virtual	Multinode HW	Single SEC	MultiSEC	
<b>Expected Retention period in days (under average deployment conditions)</b>									
5,000	562	50	100	200	300	600	Up to 3 years NA	Up to 3 years	Up to 3 years Not recommended when individual device's logging rate exceeds 8,500 eps
10,000	1,123	25	50	100	150	300			
20,000	2,246	12.5	25	50	75	150***			
50,000	5,616	NA	NA	NA	30	60			
75,000	8,424	NA	NA	NA	NA	40			
100,000	11,232	NA	NA	NA	NA	30			
200,000	22,464	NA	NA	NA	NA	NA			

**Note:** The on-premises log retention in days above are based on average deployment conditions, and may vary materially in different production environments.

\* Single node = Repurposed SMC 2210 (HW or Virtual)

\*\* Multi-node = SMC 2210 + FC 4210 + DS 6200 (All appliances HW or Virtual)

\*\*\* Compare FMC native logs retention 1/2 day @ 20,000 peak eps

## Cisco Secure DDoS Protection (formerly Radware Virtual DefensePro DDoS Mitigation Option)

### Overview

Cisco Secure DDoS Protection is provided by Radware Virtual DefensePro (vDP), available and supported directly from Cisco. It is available with the Cisco Firepower 9300 and select Cisco Firepower 4100 Series models running either the ASA or FTD software image. The following table details Firepower model and software image compatibility with Radware vDP.

**Table 9.** Cisco Secure DDOS Protection (Radware vDP) on Cisco Firepower running either ASA or FTD software image

Firepower Series	ASA Compatibility	FTD Compatibility
9300 Series - All Security Modules	yes	yes
4100 Series - All Models	yes	yes

## Performance

The performance figures in the tables below apply to all Cisco Firepower 9300 and 4100 Series model configurations running either the ASA or FTD software image.

**Table 10.** Key DDoS performance metrics for Cisco Firepower 4100 Series

Parameter	Firepower 4100 Metric
<b>Maximum mitigation capacity/throughput</b>	10 Gbps
<b>Maximum legitimate concurrent sessions</b>	209,000 Connections Per Second (CPS)
<b>Maximum DDoS flood attack prevention rate</b>	1,800,000 Packets Per Second (PPS)

The performance figures in the following table are for Cisco Firepower 9300 with 1 to 3 Security Modules irrespective of Security Module type.

**Table 11.** Key DDoS performance metrics for Cisco Firepower 9300 with 1, 2, or 3 Security Modules

Parameter	Firepower 9300 with 1 Security Module	Firepower 9300 with 2 Security Modules	Firepower 9300 with 3 Security Modules
<b>Maximum mitigation capacity/throughput</b>	10 Gbps	20 Gbps	30 Gbps
<b>Maximum legitimate concurrent sessions</b>	209,000 Connections Per Second (CPS)	418,000 Connections Per Second (CPS)	627,000 Connections Per Second (CPS)
<b>Maximum DDoS flood attack prevention rate</b>	1,800,000 Packets Per Second (PPS)	3,600,000 Packets Per Second (PPS)	5,400,000 Packets Per Second (PPS)

## Capacity vs. Licensing

**Performance/Capacity/Throughput** is dependent on the number of cores assigned to the vDP virtual device:

- By default, Radware virtual DefensePro (vDP) installs using 6 cores (1 management, 5 software) across each of Cisco Firepower 9300's Security Modules and 4100 Series platforms.
- At install, the number of cores assigned to vDP can be adjusted from 2 to 10 to optimize the throughput performance of Cisco Firepower appliance depending on the customer need.
- While using the default 6 cores, the performance numbers for vDP are constant across platforms. The table below represents the relative performance level expected from ASA and FTD by removing 6 cores from the total available cores on the respective platforms (i.e. 24 cores minus 6 equals 75% of the total performance still available).

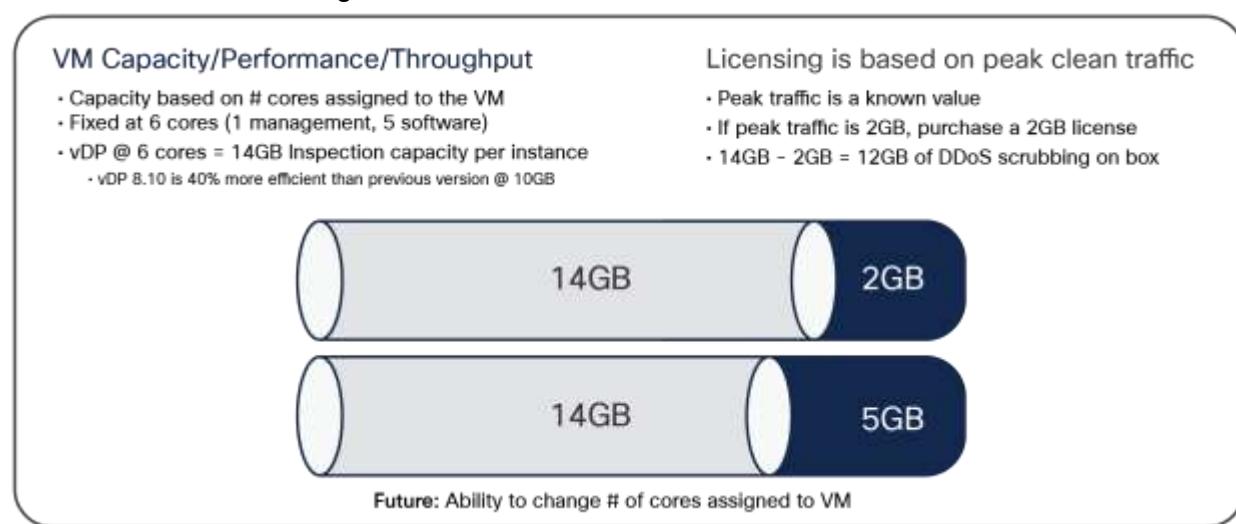

**Table 12.** Expected ASA or FTD image performance with 6 of the available cores assigned to vDP

Cisco Firepower Model	Total vCores	Expected ASA or FTD Performance with vDP Active
Firepower 9300 - SM-56	56	89.3%
Firepower 9300 - SM-48	48	87.5%

Cisco Firepower Model	Total vCores	Expected ASA or FTD Performance with vDP Active
Firepower 9300 - SM-40	40	85.0%
Firepower 4145	44	93.2%
Firepower 4125	32	90.6%
Firepower 4115	24	75.0%
Firepower 4112	24	75.0%

**Licensing** is based on the amount of legitimate traffic, not the capacity of the VM to process information.

- Purchase vDP licenses based on the amount of the client's peak legitimate traffic flow.
- This approach differs from other vendors that charge based on attack volume. Radware licenses are based on **known** legitimate traffic rather than an **unknown** attack volume.

**Figure 3.**  
Capacity vs. licensing

**Example 1:** Client has a 10-Gbps WAN link with a daily peak traffic flow of 2-Gbps.

- Purchase a 2-Gbps license or higher if the traffic is expected to increase in the near future.
- vDP will be able to mitigate a DDoS attack up to the capacity of the WAN link's 10-Gbps, after which a cloud scrubbing solution will have to take over at the ISP level.
  - Radware can be set up to automatically notify a cloud scrubber to take over.
  - Radware's Emergency Response Team (ERT) can assist in configuring vDP for each customer as part of the standard Cisco ECMU support contract for vDP.
  - Radware cloud availability on GPL is on the roadmap.
- **Warning: Do not over-purchase or over-quote the client's throughput needs. License is based on clean traffic only, not the capacity of the VM.**

## The vDP Software Licenses and Support SKUs

The following tables outline the product information and SKUs for ordering. Cisco is only OEMing the Virtual License for Radware Manager Vision. Customers may want additional Manager Options that are provided directly by Radware.

### Notes:

- Radware vDP license are based on legitimate traffic. Please refer to this deck for more details: [Cisco Secure DDoS Protection](#)
- L-RDWR-APV-VA includes both APSolute Vision with Security Reporter – 10 vDP
- The CON Service SKUs should automatically be added to the cart with a 12-month term
- Cisco will provide Level 0/1 to determine if problem is Cisco Firepower or vDP. All vDP issues will be escalated to Radware.

- Radware vDP clustering is currently only supported in the Cisco Firepower 9300 intrachassis configuration. This is clustering of multiple security modules (SM-40, SM-48, SM-56) within the same Cisco Firepower 9300 chassis.
- For High Availability (HA), Active-Active and Active-Standby modes are supported.
- Radware Vision Manager is a Virtual License and needs to be installed on its own server, not the Cisco Firepower platform. For version 4.6, VMware ESXi 5.1, 5.5, 6.0, 6.5, 6.7, 6.7U2 or VMware Workstation 8 or 11 are supported. Please check Cisco Secure Firewall Radware DefensePro DDoS Release Notes for details.
- Cisco Secure DDOS Protection (Radware vDP) Ordering Steps

#### Ordering SPARE SKUs for existing equipment:

Spare SKUs are provided (start with “L” and end in “=” sign) to allow you to order the vDP software license for existing equipment. These are L-FPR-RVDP-10G=. 5G=, and 2G=, respectively.

- Go to the [Cisco Commerce home page](#).
- Create a new estimate or edit an old one.
- In the “Search by SKU” box, paste in one of the SPARE SKUs. Or click on the “Find Products and Solutions” link to the right of the “Search by SKU” box.
- Typing in “Radware” in search box will return all active Radware SPARE SKUs.

**Figure 4.**  
Find products and solutions

- Once you find the SKU you need, then click the ‘+’ sign to add it to the cart.
- Next click on the “Edit Service/Subscription” link and set the term of the service contract.

**Figure 5.**  
Edit service/subscription

A 12-month (1y) ECME contract is selected by default, but that can be increased up to 60 months (5y).

**Note:** As of this writing, you have to visit the Edit Service/Subscription link and click done to accept the default 12-month service contract. Otherwise, the cart will produce an error.

If you do not already own Radware Vision Manager, please add to your order SKU: L-RDWR-APV-VA=. This is the Radware Manager Vision and Security Reporter with support for 10 vDP instances.

### Secure Workload Ordering Steps in Firewall Bundle

#### Ordering SPARE SKUs for existing equipment

A Workload SKU is provided to allow you to order workload within a firewall bundle, securing a multi-product discount. The SKU is C1-TAAS-XX-SW-K9 and is available for Firepower 4100 and 9300 bundles.

- Go to the [Cisco Commerce home page](#).
- Select the firewall bundle to be ordered, for example FPR4115-FTD-HA-BUN.
- Click “Select Options” for the bundle to open the configurator.

Hardware, Software and Services	Estimated Lead Time	Unit List Price (USD)	Qty	Unit Net Price (USD)	Discount (%)	Extended Net Price (USD)
1.0 FPR4115-FTD-HA-BUN	Not Applicable	0.00	1	0.00	0.00	0.00

- Open the “Secure Workload” section on the left-hand side and add the license C1-TAAS-XX-SW-K9 to the bundle.
- Finalize the bundle configuration and proceed with the purchase.

### Firewall Disk Retention Service/Subscription Ordering Steps

Disk Retention service allows customers to keep firewall/FMC disks during RMAs.

- Go to the [Cisco Commerce home page](#)
- Select the Firewall/FMC product to be ordered and add it to cart
- Click on “Edit Service/Subscription” link
- Search for "DR" in the "Service Options" section. It will show the list of all disk retention service PIDs available to the product
- After selecting the service option click on “Apply” to confirm the service

## Cisco Secure Firewall Small Business Edition License Pack

### Overview

To meet real-world needs of small businesses, Cisco Secure Firewall Small Business Edition is tailor-made to simplify security. Secure Firewall Small Business Edition licenses are available in 2 types and can be ordered at the time of hardware purchase or as standalone license.

### Ordering Steps for Cisco Secure Small Business Edition

The screenshot shows the Cisco Commerce Configuration interface for the FPR1010-NGFW-K9 configuration. The configuration summary indicates a subtotal of \$109.36 and an estimated lead time of 21 days. The 'Subscriptions' section lists several SKUs, with FPR1010T-SBE-L selected. The 'Edit Options' button is highlighted with a yellow circle.

Start with one of the Firepower 1010 SKUs, for example – FPR1010-NGFW-K9.

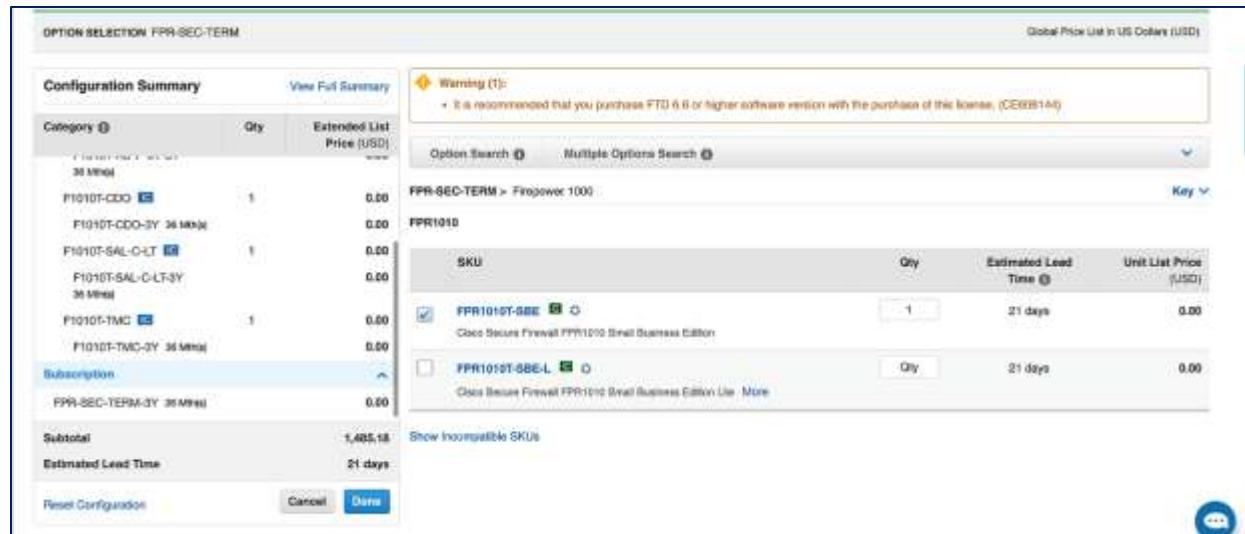

Select “Edit Options”.

Select Subscription for Small Business Edition or Small Business Edition Lite: FPR1010T-SBE or FPR1010T-SBE-L.

Select Country.

Save and exit configuration.

Configuration options for Cisco Firepower 4125 platform

The Radware vDP SKUs are available under “Feature Licenses.” When configuring a Firepower 9300, you will need 1 license of equal size for **each** blade.

The screenshot shows the 'OPTION SELECTION FPR4120-NGFW-K9' configuration screen. On the left, a 'Configuration Summary' table lists components like Redundant Power Supply, DC Power Supply, Power Cables, and Platform Software. A red arrow points to the 'Feature License' row. On the right, a 'Feature License' table lists various SKU options with their descriptions and prices. A green message at the top right indicates that 'FPR.RVDP-1G' was successfully removed from the configuration.

### Ordering Example: Cisco Firepower 1010 with FTD

#### Step 1: Smart Software Licensing

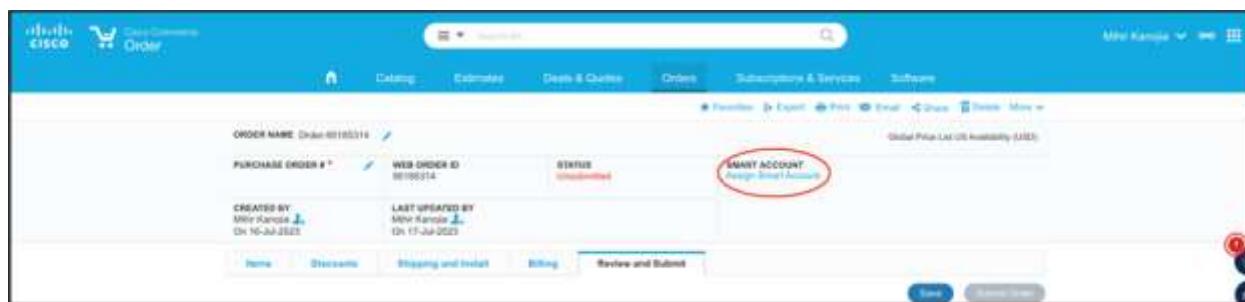

Before placing a Cisco Firepower 1010 order, the end customer must have a Cisco Smart Licensing account. For information about Smart Accounts and instructions on how to create an account, visit: <https://www.cisco.com/web/ordering/smart-software-manager/index.html>.

To associate the order's licenses with the customer's Smart Licensing account, or to begin the establishment of the Smart Licensing account, follow these steps. Note that if you are initiating the account, you can complete the order only if the account is initiated on the end customer's behalf and associated with the order.

Go to Cisco Commerce: <https://www.cisco.com/go/ccw>.

From the Orders pull-down menu, select Create Order.

Select Assign Smart Account and follow the subsequent prompts for Smart Licensing.

**Step 2:** Navigate to Catalog -> Products -> Security -> Firewalls -> Cisco Firepower 1000 Series.  
Select “Configure” for the FPR1010-NGFW-K9

The Chassis is added on the cart along with the software subscription. By default, the 3 Year FPR1010-TMC license will be added to the configuration.

**Step 3:** Follow the instructions in the yellow box. First, click the power cables link and make the cable selection in the next screen.

### Ordering Example: Cisco Secure Firewall 3140 with FTD

#### Step 1: Smart Software Licensing

Before placing a Cisco Secure Firewall 3100 order, a Smart Software Licensing account for the end customer must be initiated. If the customer already has a Smart Software Licensing account, that account must be associated with the order. More information on Smart Software Licensing account establishment is available in the Smart Software Licensing section of this ordering guide, and online at:

<https://www.cisco.com/web/ordering/smart-software-manager/index.html>.

To associate the order's licenses with the customer's Smart Licensing account, or to begin the establishment of the Smart Licensing account, follow these steps. Note that if you are initiating the account, you can complete the order only if the account is initiated on the end customer's behalf and associated with the order.

Go to Cisco Commerce: <https://www.cisco.com/go/ccw>.

From the Orders pull-down menu, select Create Order.

Select Assign Smart Account and follow the subsequent prompts for Smart Licensing.

**Step 2: Navigate to Products -> Security -> Cisco Secure Firewall 3100 series-> Cisco Secure Firewall 3140 -> FPR3140-NGFW-K9**

**Step 3: Follow the instructions on the yellow box. Select the Power Cables or the DC Power Supply.**

## Ordering Example: Cisco Firepower 4145 with ASA

## Step 1: Smart Software Licensing

Before placing a Cisco Firepower 4100 order, a Smart Software Licensing account for the end customer must be initiated. If the customer already has a Smart Software Licensing account, that account must be associated with the order. More information on Smart Software Licensing account establishment is available in the Smart Software Licensing section of this ordering guide, and online at:

<https://www.cisco.com/web/ordering/smart-software-manager/index.html>

To associate the order's licenses with the customer's Smart Licensing account, or to begin the establishment of the Smart Licensing account, follow these steps. Note that if you are initiating the account, you can complete the order only if the account is initiated on the end customer's behalf and associated with the order.

Go to Cisco Commerce: <https://www.cisco.com/go/ccw>

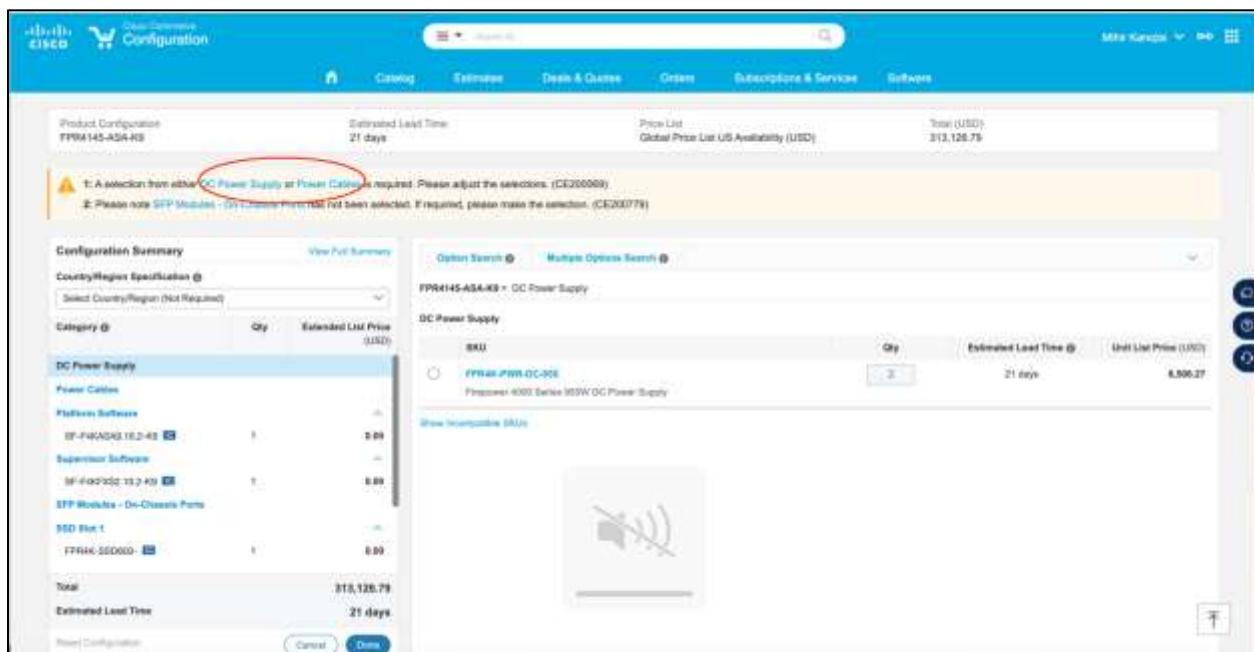

From the Orders pull-down menu, select Create Order.

Select Assign Smart Account and follow the subsequent prompts for Smart Licensing.

**Step 2:** Navigate to Products -> Security -> Cisco Firepower 4100 Series -> Cisco Firepower 4145 Security Appliance -> FPR4145-ASA-K9

**Step 3:** Click on the Power cables to make the selection.

### **Ordering Example: Cisco Secure Firewall 4225 with FTD**

#### **Step 1: Smart Software Licensing**

Before placing a Cisco Secure Firewall 4200 order, a Smart Software Licensing account for the end customer must be initiated. If the customer already has a Smart Software Licensing account, that account must be associated with the order. More information on Smart Software Licensing account establishment is available in the Smart Software Licensing section of this ordering guide, and online at:

<https://www.cisco.com/web/ordering/smart-software-manager/index.html>.

To associate the order's licenses with the customer's Smart Licensing account, or to begin the establishment of the Smart Licensing account, follow these steps. Note that if you are initiating the account, you can complete the order only if the account is initiated on the end customer's behalf and associated with the order.

Go to Cisco Commerce: <https://www.cisco.com/go/ccw>.

From the Orders pull-down menu, select Create Order.

Select Assign Smart Account and follow the subsequent prompts for Smart Licensing.

## 4200 Firewall Solution Attached Services Ordering Example

1. In Cisco Commerce Workspace (CCW), click Estimate dropdown. Select Create Estimate.

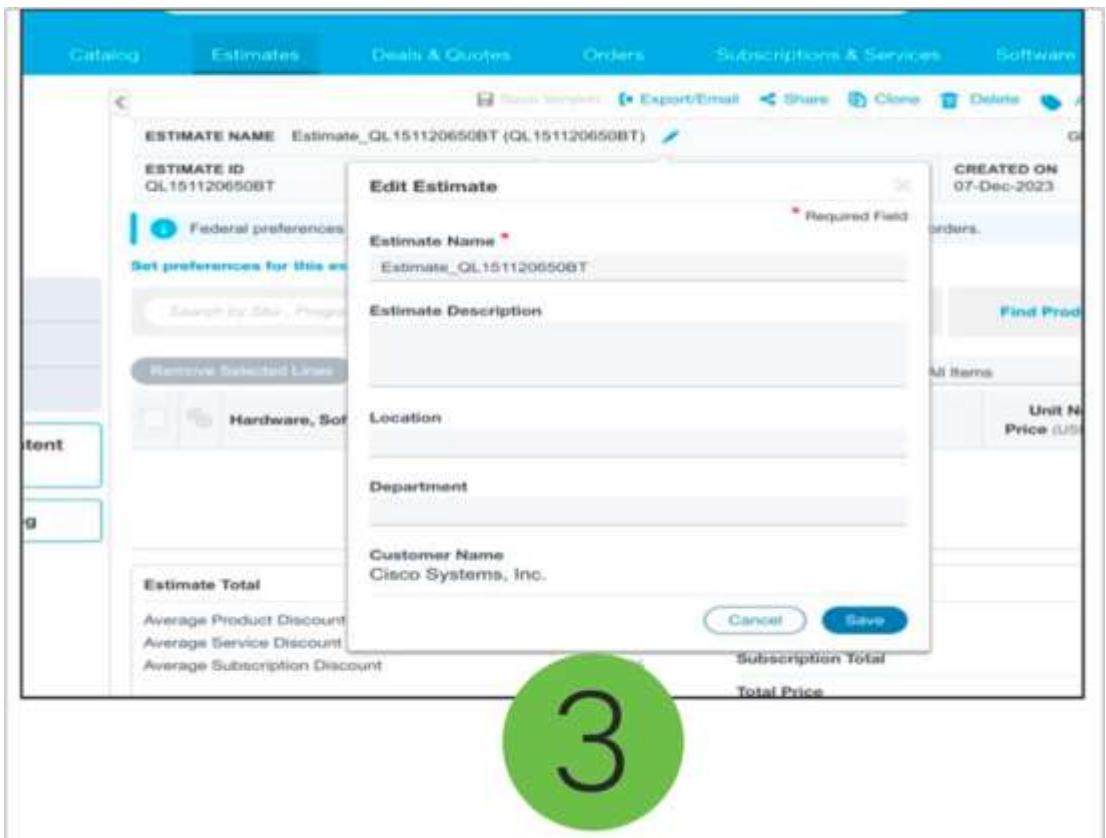

The screenshot shows the Cisco Commerce Workspace (CCW) interface. The top navigation bar includes 'Catalog', 'Estimates', 'Deals & Quotes', 'Orders', and 'Subscriptions & Services'. The 'Estimates' menu is open, showing 'Create Estimate' (which is highlighted with a green circle and the number 1), 'Access Shared Estimate', 'View All Estimates', 'Recent', 'Shared', 'Saved Searches', 'Tags', 'Customer Estimates', and 'Claim Estimate'. To the right, a table lists estimates with columns for 'Name', 'Status', 'Created By', and 'Created On'. A note states: 'Product preferences defined for this estimate will not be reflected in the corresponding quotes or orders.' A large green circle with the number 1 is overlaid on the 'Create Estimate' link.

2. On the estimate page, complete all necessary fields

The screenshot shows the Cisco DNA Estimates interface. On the left, a sidebar titled 'I want to ...' lists options like 'View Estimate Information', 'Link to Opportunity', 'Set Install/Service Location', 'Security Subscriptions', 'AS-Fixed', 'Learning Credits', 'Recommended Content for your Estimate' (which is highlighted in blue), and 'Browse DNA Catalog'. The main area displays estimate details: Estimate Name (Estimate\_DL151120650BT), Estimate ID (DL151120650BT), Created By (Abrar Ahmed), and Created On (07-Dec-2023). A note states that federal preferences defined for this estimate will not be reflected in corresponding quotes or orders. Below this is a 'Set preferences for this estimate' section with a search bar and a 'Find Products & Solutions' button. The product catalog table has columns for Estimated Lead Time, Unit List Price (USD), Qty, Unit Net Price (USD), Discount (%), and Extended Net Price (USD). A message 'No records' is shown. At the bottom, the 'Estimate Total' section shows average discounts and totals. A large green circle with the number 2 is overlaid in the center of the page.

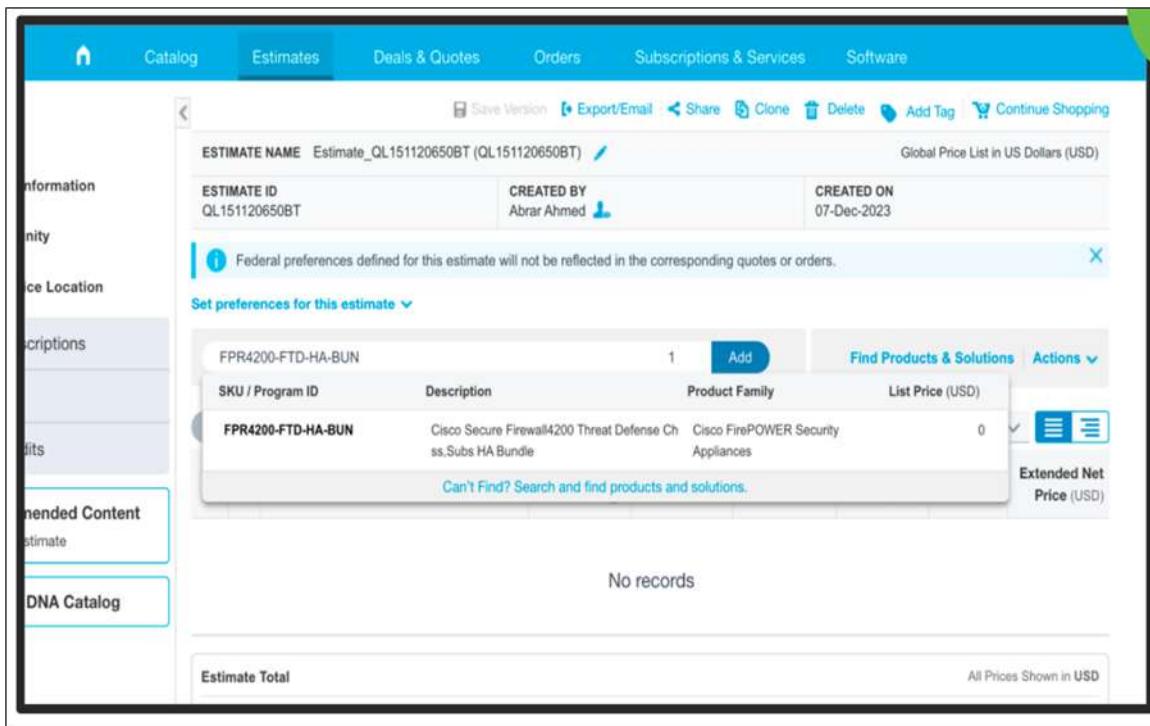

3. Click Edit Estimate tab. Complete fields on page. Click Save and Continue when done

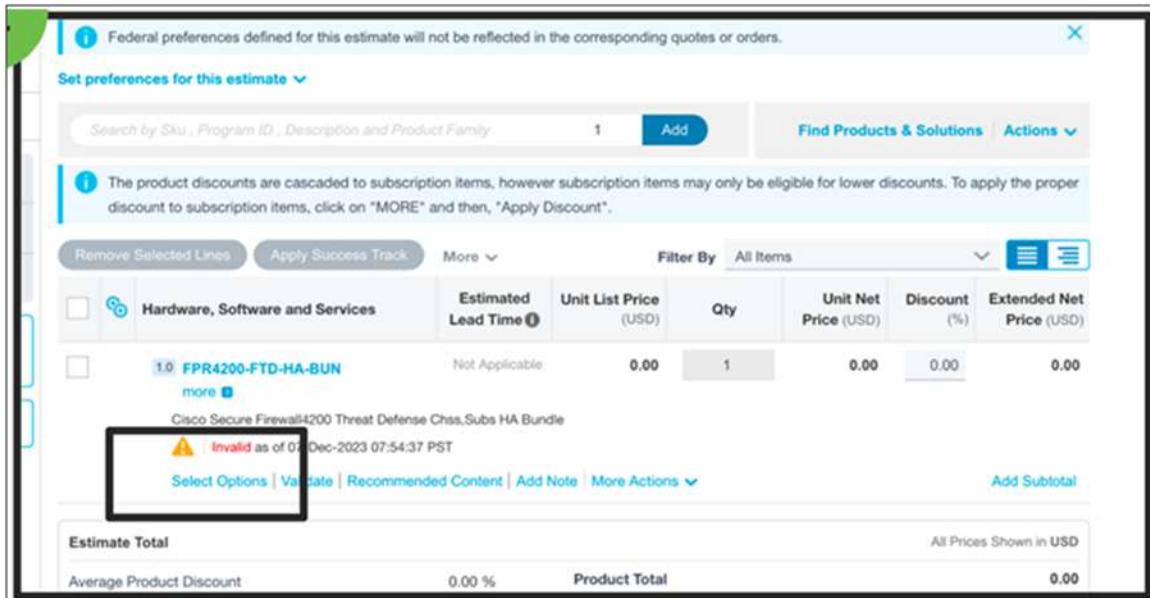

The screenshot shows the 'Edit Estimate' modal window. The 'Edit Estimate' tab is selected. The 'Estimate Name' field is populated with 'Estimate\_DL151120650BT'. The 'Estimate Description' field is empty. The 'Location' and 'Department' fields are also empty. The 'Customer Name' field is populated with 'Cisco Systems, Inc.'. At the bottom of the modal are 'Cancel' and 'Save' buttons. The background shows the main estimate details and product catalog sections of the Cisco DNA Estimates interface. A large green circle with the number 3 is overlaid in the center of the modal.

4. Under the Estimate tab:

- Enter FPR4200-FTD-HA-BUN into Search field.
- Click Add.
- Select a Select Options.

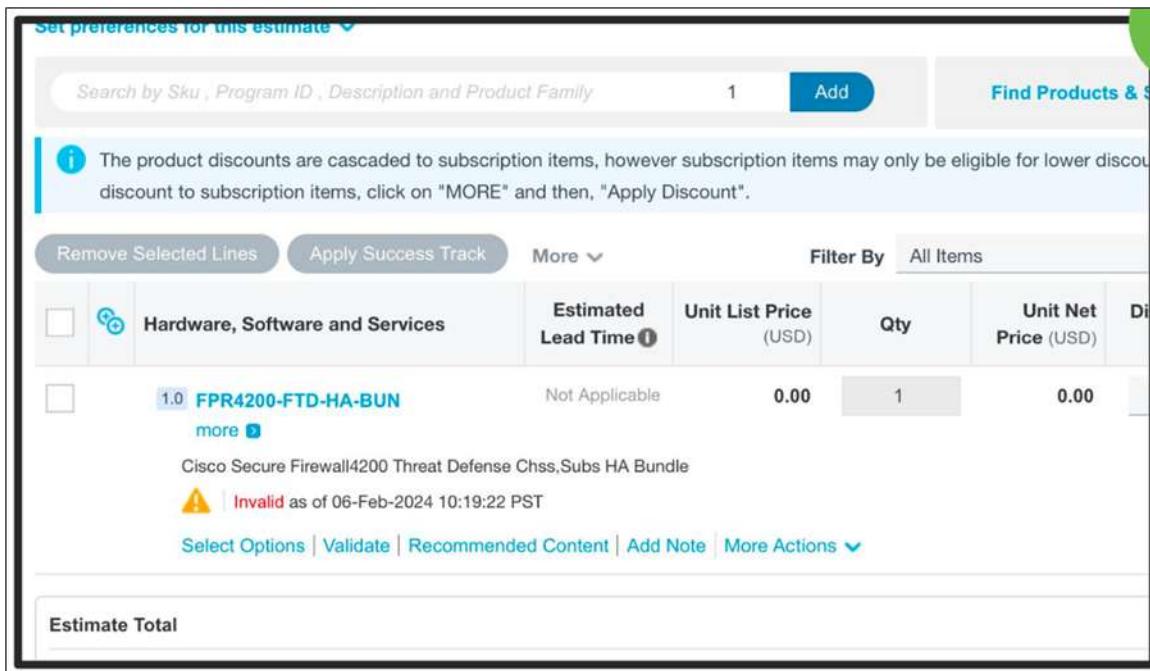

The screenshot shows the Cisco DNA Center interface with the 'Estimates' tab selected. The estimate name is 'Estimate\_QL151120650BT (QL151120650BT)'. The estimate ID is 'QL151120650BT', created by 'Abrar Ahmed' on '07-Dec-2023'. A message indicates that federal preferences defined for this estimate will not be reflected in the corresponding quotes or orders. The product list shows one item: 'FPR4200-FTD-HA-BUN' with a description 'Cisco Secure Firewall4200 Threat Defense Chs.Subs HA Bundle'. The product family is 'Cisco FirePOWER Security Appliances'. The list price is '0' and the extended net price is also '0'. A note at the bottom says 'Can't Find? Search and find products and solutions.' Below the table, it says 'No records'.

The screenshot shows the Cisco DNA Center interface with the 'Estimates' tab selected. The estimate name is 'Estimate\_QL151120650BT (QL151120650BT)'. ### SKUs and Ordering for Cisco Firepower 9300

The following tables outline the product part number information for the Cisco Firepower 9300. Note that the customer may want extra power supplies and fans. You can add these to the order separately. When you order, you choose between one and three security modules per chassis. Note that security module types cannot be mixed within a chassis.

**Table 58.** Chassis and sublevel assemblies and components included with each chassis

Part Number (Chassis Hardware)	Description
<b>FPR-C9300-AC</b>	Cisco Firepower 9300 AC Chassis - includes 2 power supply units + 4 fans + rack-mount kit (3RU; accommodates up to three security modules)
<b>FPR-C9300-DC</b>	Cisco Firepower 9300 DC Chassis - includes 2 power supply units + 4 fans + rack-mount kit (3RU; accommodates up to three security modules)
<b>FPR-C9300-HVDC</b>	Cisco Firepower 9300 high-voltage DC Chassis - includes 2 power supply units + 4 fans + rack-mount kit (3RU; accommodates up to three security modules)

<b>FPR9K-SM56-FTD-BUN</b>	Cisco FPR9300 SM-56 Threat Defense Chassis, Subs HA Bundle
<b>Breakout Cables</b>	Generic breakout cables can be used, please see: <a href="https://www.cisco.com/c/en/us/products/collateral/interfaces-modules/transceiver-modules/data_sheet_c78-660083.html">https://www.cisco.com/c/en/us/products/collateral/interfaces-modules/transceiver-modules/data_sheet_c78-660083.html</a>

**Note:** There are eight 10-Gbps ports on the supervisor module bundled by default with the chassis. However, customers that plan to use supervisor module ports will require connectors for both those ports as well as for the ports on the network modules. Only one 1-Gbps connector, for the management port, is included by default with each supervisor module.

#### SKUs for Cisco Firepower 9300 Series Licenses and Firewall Threat Defense Subscriptions

When ordering a Cisco Firepower 9300 firewall with the ASA configuration, a Standard (base) ASA license (L-F9K-ASA) is required.

Alternatively, when ordering a 9300 Series with the Cisco Secure Firewall Threat Defense image, base AVC capability comes by default with Cisco Secure Firewall Threat Defense license (L-FPR9K-TD-BASE=). Additionally, subscriptions can be purchased (one license per security module) to add IPS, URL Filtering, and malware defense capabilities. Similarly, if the customer already has a Firepower 9300, the same PIDs are used to upgrade to the Cisco Secure Firewall Threat Defense image. Subscription terms are 1, 3, and 5 years, with the greatest price discount at 5 years. In the listed part numbers, the threat services are identified as follows:

**Table 64.** Threat subscription decoder

Threat Subscription Abbreviations	Description
<b>T</b>	Threat (Security Intelligence and IPS)
<b>M or AMP*</b>	Malware defense
<b>C or URL*</b>	URL Filtering
<b>1Y</b>	<b>1-Year</b> Subscription
<b>3Y</b>	<b>3-Year</b> Subscription
<b>5Y</b>	<b>5-Year</b> Subscription

\*Note that Threat/IPS (T) License is a requirement for the use of Malware (M) or URL (C) license features.

## Ordering Example: Cisco Firepower 9300 with ASA

### Step 1: Smart Software Licensing

Before placing a Cisco Firepower 9300 order, a Smart Software Licensing account for the end customer must be initiated. If the customer already has a Smart Software Licensing account, that account must be associated with the order. More information on Smart Software Licensing account establishment is available in the Smart Software Licensing section of this ordering guide, and online at:

<https://www.cisco.com/web/ordering/smart-software-manager/index.html>.

To associate the order's licenses with the customer's Smart Licensing account, or to begin the establishment of the Smart Licensing account, follow these steps. Note that if you are initiating the account, you are able to complete the order only if the account is initiated on the end customer's behalf and associated with the order.

Go to Cisco Commerce: <https://www.cisco.com/go/ccw>.

From the Orders pull-down menu, select Create Order.

Select Assign Smart Account and follow the subsequent prompts for Smart Licensing.

**Step 2:** Navigate to Catalog > Products > Security > Cisco Firepower 9300 Series -> Search for FPR9KT-HA-BUN. Add the chassis to the cart by clicking add.

Category	Product	Unit List Price (USD)	Quantity	Total Price (USD)
Hardware, Software and Services	Cisco FPR9300 Threat Defense Chassis, Basic HA Bundle	\$0.00	1	\$0.00

Average Product Discount (%)	Product Total
0.00 %	\$0.00
0.00 %	\$0.00
0.00 %	\$0.00
Total Price	\$0.00

### Step 3: Check the box 1.0 FPR9KT-HA-BUN and select Options.

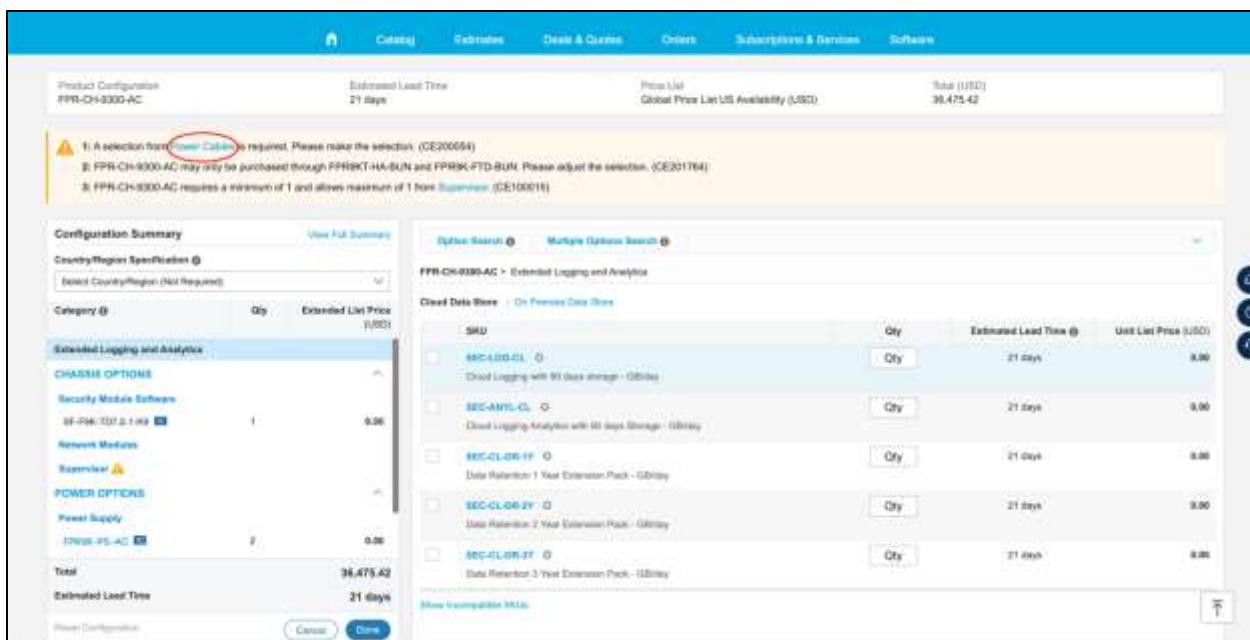

Follow the instructions in the yellow box. First click the hardware and make the selection.

Product	Unit List Price (USD)	Adjusted Unit Price (USD)	Qty	Retained List Price (USD)

## SKUs and Ordering Guidance for Cisco Secure Firewall Threat Defense Virtual

Cisco Secure Firewall Threat Defense Virtual is available where virtualized firewall and IPS capabilities are required, including in public cloud environments. It is the virtualized version of Firewall Threat Defense. It enables consistent security policies to follow workloads across your physical, virtual, and cloud environments, and between clouds. Complexity is further minimized with simple provisioning and a single console, the Firewall Management Center (FMC), which enables threat visibility, and automated defense, across your estate. FMC can manage both physical and virtual devices. See the Firewall Management Center section of this guide for FMC part numbers.

In Amazon Web Services (AWS), Microsoft Azure, Google Cloud Platform (GCP) and Oracle Cloud Infrastructure (OCI) environments, Cisco Secure Firewall Threat Defense Virtual devices can be managed either by an on-premises FMC, or in the respective public cloud with the virtualized FMC. When deployed in AWS and Microsoft Azure environments, two licensing models are available:

- Bring Your Own License (BYOL), where an existing Threat Defense Virtual license is required.
- Hourly billing (a pay-as-you-go model) is available through the AWS interface.

Google Cloud Platform (GCP) and Oracle Cloud Infrastructure (OCI) only support the Bring Your Own License (BYOL) licensing model.

For the supported private cloud platforms and Hyper Converged Infrastructure like Cisco Hyperflex and Nutanix AHV the same licenses can be used in the BYOL model.

Cisco Secure Firewall Threat Defense Virtual enables inter-VM and east-west traffic inspection, as well as at ingress and egress points to the cloud. It is designed to address security concerns in both traditional networks infrastructures and to be optionally inserted into Cisco's Application Centric Infrastructure (ACI) for flexible orchestration.

### Firewall Threat Defense Virtual performance tiered Subscriptions

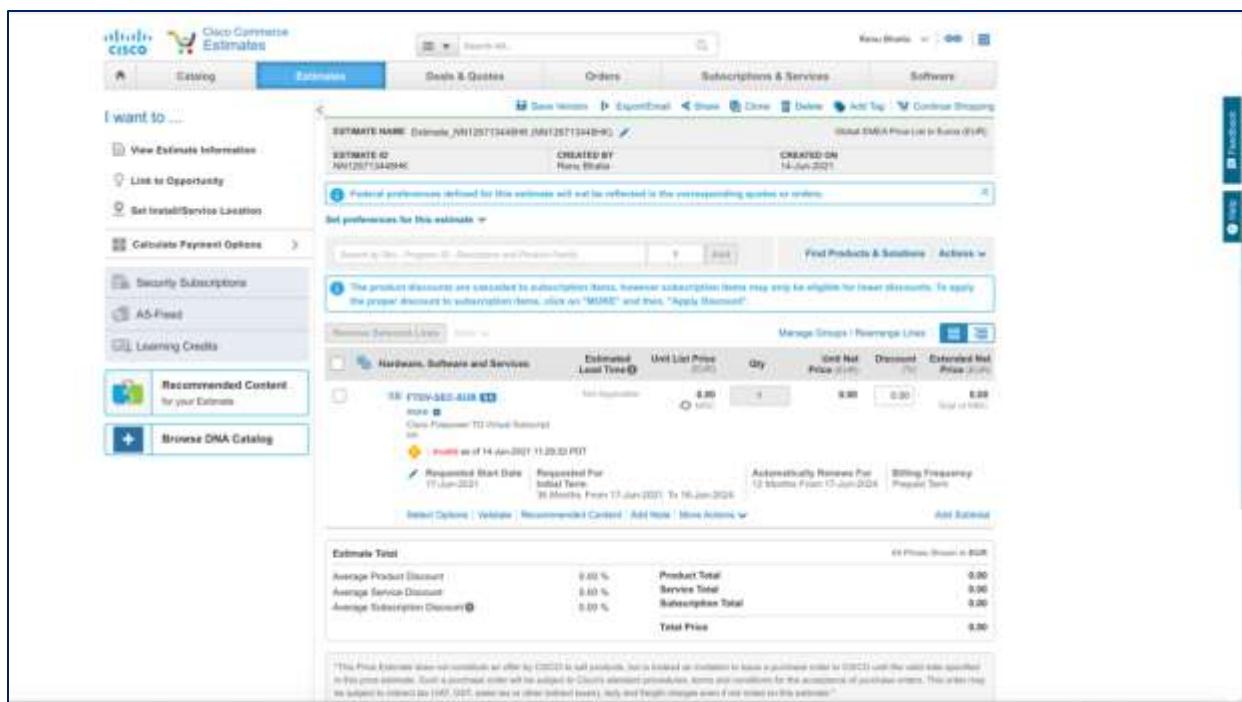

Performance tiered licensing is available starting from Firewall Threat Defense Virtual version 7.0. The new licensing model also includes Base License as a subscription. There are 6 tiers in the new performance tiered licensing model which can be ordered using the following SKU's.

### SKUs and Ordering Guidance for Cisco Adaptive Security Virtual Appliance (ASAv)

The Cisco ASAv brings the power of ASA to the virtual domain and private cloud environments. It runs the same software as the physical ASA appliance to deliver proven security functionality. You can use ASAv to protect virtual workloads within your data center. Later, you can expand, contract, or shift the location of these workloads over time and can span physical and virtual infrastructures. The Adaptive Security Virtual Appliance runs as a virtual machine inside a hypervisor in a virtual host. Most of the features that are supported on a physical ASA by Cisco software are supported on the virtual appliance as well, except for clustering and multiple contexts. The virtual appliance supports site-to-site VPN, remote-access VPN, and clientless VPN functionalities as supported by physical ASA devices. See the [ASAv data sheet](#) for more details.

ASAv is available in both subscription and perpetual licensing models.

## Qualys Connector

The Qualys Connector is a software application that collects Qualys Guard vulnerability report data and sends it to the Cisco Secure Firewall Management Center. The Qualys vulnerability data is then aggregated with Cisco's vulnerability information found in the host map. Customers can choose to use Cisco or Qualys vulnerability data, or both, for Impact Flag calculations and automatic rule recommendations.

## Firepower Product Licensing and License Activation

- The customer logs on to <https://cisco.com/go/licensing> and uses the Smart Licensing feature to request a token to be installed in the FMC or FDM. This license is then applied to the Cisco Secure Firewall Management Center that is going to manage the feature or appliance.
- Exception: Cisco Secure Endpoint (formerly AMP for Endpoints) does not require an activation key at this time.

## High-Availability Configurations

### Type 1: Secure Firewall High-Availability

- If the customer wants high availability for sensors, two appliances are required.
- Appliances must be of the same model and generation.
- Both appliances must be identically licensed and have support.
- Licenses will be applied to the same primary Cisco Secure Firewall Management Center managing the high-availability pair.

## Snort Subscriber Rule Set: Subscription Options

**Personal:** This subscription type is for use in a home network environment. If you'd like to purchase a subscription online using a credit card, you may do so. For a personal subscription, please go to <https://www.snort.org/products> to place an order. It is not available to purchase on Cisco Commerce. As you approach the expiration date, renewal by way of Snort.org is automatic for credit card orders and is part of the license agreement.

**Business:** This subscription type is for use in businesses, nonprofit organizations, colleges and universities, government agencies, consultancies, and other venues where Snort sensors are in use in a production or lab environment. This subscription type does not include a license to redistribute the Snort Subscriber Rule Set except as described in section 2.1 of the Rule Set license agreement.

If you'd like to purchase a Rule subscription online using a credit card, you may do so. Customers or end users who cannot purchase by credit card are requested to contact a partner or distributor who can purchase on their behalf through Cisco Commerce. If you need assistance with a quote, contact [snort-sub@cisco.com](mailto:snort-sub@cisco.com). Unlike Snort.org automatic renewals, orders placed in Cisco Commerce require a manual renewal to trigger another subscription. Important: Email address of the recipient of the subscription license needs to be included on the order for electronic delivery.

For more information, visit: <https://www.snort.org/products>.

## SKUs and ordering guidance for Cisco Security Manager

**Cisco Security Manager** provides scalable and centralized operations management for ASA functions, including policy and object management, event management, reporting, and troubleshooting for Cisco ASA firewall functions. The Security Manager can be used to manage:

- Cisco Firepower 1000, 200, 3100 4100, 4200, 6100 and 9300 series platforms with ASA software.
- Cisco Secure Firewall ASA Virtual on Private and Public Cloud.
- Cisco Secure Client (formerly AnyConnect Secure Mobility Client).

Security Manager is available in two feature levels: Standard and Professional (Table 64). Enterprise customers with numerous security devices will benefit from Security Manager Professional, and customers with fewer security device deployments will find Security Manager Standard an exceptional value. For small-scale and simple deployments, the Cisco Adaptive Security Device Manager (ASDM) is available to provide on-device, GUI-based firewall network operations management for Cisco ASA deployments.

**Note:** Modern server hardware is required. Please see the Cisco Security Manager data sheet for more details.

## SKUs and ordering guidance for Cisco Secure Firewall Management Center

The **Cisco Secure Firewall Management Center**, available as a physical or virtual appliance, provides unified management of:

- Cisco Secure Firewall Threat Defense software on the Cisco Firepower 1000 Series appliances.
- Cisco Secure Firewall Threat Defense software on the Cisco Secure Firewall 200 Series appliances.
- Cisco Secure Firewall Threat Defense software on the Cisco Firepower 3100 Series appliances.
- Cisco Secure Firewall Threat Defense software on the Cisco Firepower 4100 Series appliances.
- Cisco Secure Firewall Threat Defense software on the Cisco Firepower 4200 Series appliances.
- Cisco Secure Firewall Threat Defense Virtual.
- Cisco Secure Firewall Threat Defense software on the Cisco Firepower 9300.
- FirePOWER module of Cisco ASA with FirePOWER Services (up until release 7.4).
- Cisco Secure Intrusion Prevention System (IPS) and Cisco Secure Firewall malware defense solutions (up until release 7.0).
- Cisco Secure Firewall Threat Defense for Integrated Services Routers (ISR).

The Firewall Management Center provides a centralized management console and event database repository. It is available in a range of physical appliance models, as a virtual appliance for private and public cloud platforms or a cloud-delivered version that is delivered via Cisco Security Cloud Control. One physical or virtual management appliance can manage multiple appliances as long as all the appliances are running the compatible firewall configuration.

The appropriate Firewall Management Center hardware is selected based on the firewall configuration deployed and the number of appliances and events to be monitored. Firewall Management Center 1700, 1800, 2700, 2800, 4700 and 4800 physical appliances or the Firewall Management Center virtual appliance can be used to manage Cisco ASA with Firepower Services and the Firewall Threat Defense (FTD) software image. Cisco Security Manager is required to manage ASA physical or virtual appliance firewall functionality. Cisco Security Cloud Control delivers the cloud-delivered version of Firewall Management Center and a consistent and simplified cloud-based security policy management for ASA, ASA with FirePOWER Services, and FTD devices. For more details, visit [Cisco Security Cloud Control](#) home page. For Security Cloud Control ordering details, visit the [Guidelines for Quoting Cisco Security Cloud Control Firewall Management](#).

<b>UCSC-PSU1-1200W-D=</b>	1200W Power Supply Spare for FMC1800, 2800, 4800

For new deployments, a compatible Management Center can be ordered with Firepower 3100 Series, 4100 Series, 4200 Series, and Secure Firewall 9300 devices. For small-scale FTD deployments, Firewall Device Manager on-device manager is included (except for CSF 4200).

**Note:** To manage network operations in large-scale deployments of devices running the ASA software image, using Cisco Security Manager or Cisco Security Cloud Control is highly recommended.

## SKUs and Ordering Guidance for Cisco Secure Firewall Management Center Virtual Appliance

The PAK-enabled, 2- and 10-device Firewall Management Center Virtual Appliances (FMCv) are part of a promotional offer to more cost-effectively manage FirePOWER Services or Firewall Threat Defense on small-scale deployments of low-end ASA-X Series appliances. However, the 2-, 10-, and 25-device FMCv Smart License or PAK SKUs do not have any limitations with respect to which appliances they can manage. For add-on licenses requirement for new devices on your FMCv, it is recommended to migrate to a higher FMCv model that supports additional devices.

**Table 78.** Smart Licensing-enabled Cisco Secure Firewall Management Center Virtual Appliance SKUs

**Note:** FMCv SKUs are not tied to specific Private or Public Cloud platforms. The SKUs listed can be used with any supported Private or Public Cloud Deployment.

## Licensing Guidance for Cisco Secure Firewall Management Center

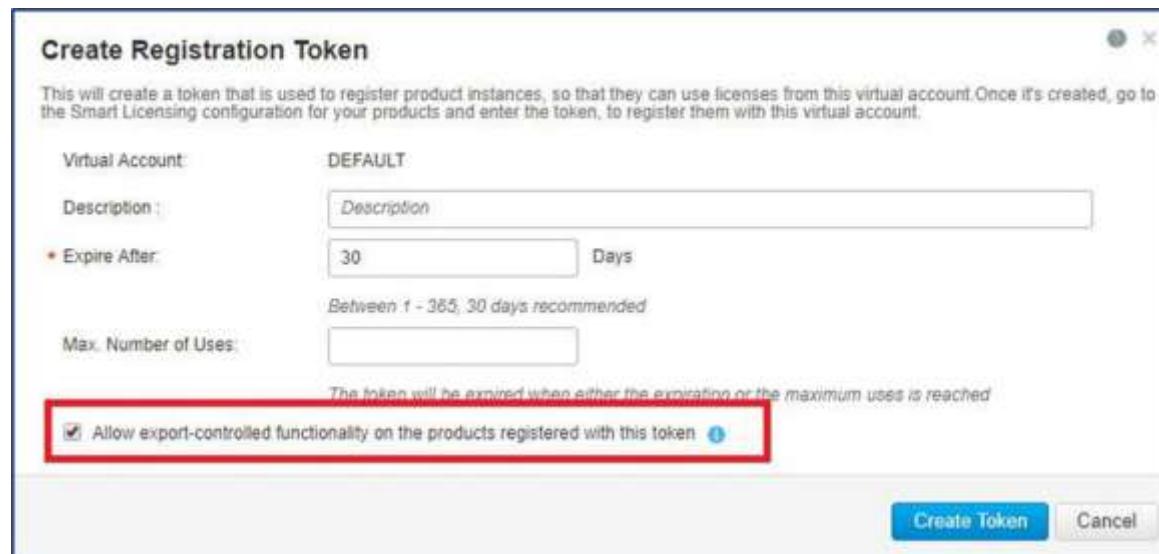

Firewall Management Center physical appliances do not require any separate management licenses. Firewall Management Center virtual appliances require only one of the licenses mentioned in the previous table based on the number of devices being managed. These licenses cannot be combined, for example, entitlement for management of four (4) managed devices, a minimum of one (1) Cisco Secure Firewall Management Center, for 10 devices is required. Use of two (2) Cisco Secure Firewall Management Center, for 2 devices licenses is not compliant for this use-case. Separate to the Firewall Management Center, the managed devices each require classic or Smart subscription feature licenses. Firewall Management Center Virtual Appliance Smart SKUs can manage any device running Firewall Threat Defense software.

### **IMPORTANT: For version 6.3 and later:**

Enablement of strong crypto features (3DES/AES VPN) continues to happen automatically via Smart Licensing for those customers that are not subject to export restrictions or require an export license. However, those customers who are subject to export restrictions or require an export license will be asked to select a \$0 strong crypto enablement key during configuration of any FMC device with version 6.3+.

For those customers who are subject to export restrictions or require an export license that upgrades an existing FMC to version 6.3+, there are spare versions of the PIDs available (those with “=” suffix).

To determine if you are subject to export restrictions or require an export license, customers can log in to CSSM and try to generate an installation token. For those customers that do NOT have export restrictions, this box will be checked by default. If you do NOT see this box or are NOT able to check the box, this means that your account is subject to export restrictions. See image below:

**Table 79.** Cisco Secure Firewall Management Center strong crypto enablement SKUs

The standalone Cisco Secure Firewall Management Center is optimal for high-availability pairing. For the FMC, a high-availability or redundancy feature helps ensure continuity of operations. The secondary Management Center must be the same model as the primary appliance.

The Cisco Secure Firewall Management Center Virtual Appliance also supports High Availability on some Private and Public Cloud offerings. Use of High Availability for Cisco Secure Firewall Management Center Virtual requires an additional identical license.

#### **Product high-availability configuration:**

High availability for the Management Center

- If the customer wants high availability for the Management Center, an additional appliance is required.
- The secondary Management Center must be of the same model and generation as the primary one.
- License keys for all sensors, feature licenses (including Cisco Firepower), and subscriptions managed on the primary Management Center can be duplicated and loaded onto the secondary Management Center using the original activation keys.

## High availability for the Management Center Virtual Appliance

- If the customer wants high availability for the Management Center Virtual Appliance, two (2) identical licenses (see Table 67) are required.
- High Availability support varies across Private and Public Cloud as well as model types, please review the latest guidance provided in the Cisco Secure Firewall Management Center Administration Guide for specific information.
- High availability for the Management Center Virtual Appliance is not supported by the Cisco Secure Firewall Management Center, for 2 devices license.

## Connect and protect bundle ordering

### Overview

Partners can now order Cisco's security portfolio tailored for 3 specific customer use cases: Secure Campus, Secure Branch and Secure Hybrid Datacenter. The bundles include products that address the real-world needs of each use case. The bundles are designed to simplify ordering and provide an attrprice pointe-point.

Please contact your partner for eligibility and additional information.

## Additional resources

### Cisco Commerce

[Cisco Commerce](#) is the primary tool used for ordering Cisco products and new services offered on the Cisco Price List. Three main steps are involved in creating an order: creating a quick quote, converting a quote to an order, and submitting an order.

Cisco Commerce Software Subscriptions and Services (CCW-R) is used to quote, order, and manage your service contracts and software subscriptions. Use [CCW-R](#) to create new or renew Technical Services (TS) and software subscription (Term-and-Content) quotes, submit approved orders, and manage your contracts.

### Cisco Capital Financing

The significant benefits offered by the Cisco Firepower 9300 make it the natural choice for service provider security and provisioning. As with any technology investment, the question is whether the new system is affordable. The answer is Cisco Capital financing. We can give customers the financing solution that works best for them. We offer both flexible repayments to help mitigate cash flow issues and operating leases to help negate capital expenditures.

Cisco Capital can help remove or reduce the barriers preventing organizations from obtaining the technology they need. Total solution financing programs help customers and partners:

- Achieve business objectives.
- Accelerate growth.
- Acquire technology to match current strategies and future needs.
- Remain competitive.

Cisco Capital also helps your customers achieve financial goals such as optimizing investment dollars, turning capital expenditures into operating expenses, and managing cash flow. And there's just one predictable payment. Cisco Capital operates in more than 100 countries, so regardless of location, customers and partners have access to a trusted means to secure Cisco products and services.
