

Introducing the new ReadyNAS 210 series and the 6.4 ReadyNAS OS firmware

Advanced Backup, Sync & Speed

That's new: the ReadyNAS 6.4 firmware with the following enhancements:

- ➔ ReadyCLOUD: Share folder with just a link (no more user account required)
- ➔ ReadyCLOUD: Direct copy-paste of sharing links (for files and folders)
- ➔ „Mouse-over“ contextual help
- ➔ ReadyCLOUD App for Mac
- ➔ Quota setting for shares
- ➔ More regional servers for better ReadyCLOUD performance

These enhancements apply to all ReadyNAS hardware platforms

ReadyNAS 210 at a glance

High Performance Streaming

- ➔ Superior power: 1.4GHz quad core processor
- ➔ You decide: Powerful platform for media servers like Plex, iTunes or native DLNA
- ➔ HD media streaming to multiple devices
- ➔ 1080p HD videos are transcoded at wire-speed for any device and resolution
- ➔ Real-time anti-virus protects data without performance impact

Advanced Backup, Sync & Speed

- ➔ Sync folders between ReadyNAS and PCs – always up-to-date data anywhere
- ➔ Backup files from PC/mobile to your NAS without extra software
- ➔ Time-Machine integration to backup all Macs in your home
- ➔ On-the-go backup of photos from your phone
- ➔ Link Aggregation enables up to 2x system throughput in your network

5 Levels of Data Protection

- ➔ Automatic Raid protects against disk failure
- ➔ Snapshot technology to restore data you lost
- ➔ Free real-time antivirus against malware
- ➔ Eternal data integrity with bitrot protection
- ➔ Cloud storage offers additional backup and sharing resources
