The S2522HG also features support for gaming console Variable Refresh Rate (VRR).

**More views, less distraction:** Game with minimal distractions and a larger surface area thanks to a 3-sided ultrathin bezel.

**Bold new look:** The distinct and gaming-centric design offers both functional and aesthetic benefits for gamers,

such as a downlight for ambient lighting during low-light gaming sessions, and uniquely-designed vents located in the back keeping everything cool while working hard.

**More room for battle:** The newly designed tapered stand is sturdy and sleek, with a small footprint that brings you closer to the action.

**Customize every advantage:** The new joystick and shortcut buttons on the back of the monitor allow you to easily navigate and manage the OSD menus while three user-defined profiles give even more personalisation options. The Timer, FPS (frames per second) Counter, and Dark Stabilizer let you manage everything from frame rates to brightness to shadow control.

**Game comfortably:** The easy height, pivot, tilt, and swivel adjustability allow you game in comfort for extended periods.
