Inspiron 3000 Series feature overview

Feature-packed

The 3000 Series laptops offer a rich set of standard features and options. These combine to make a laptop that's easy to use and built for the long haul.

Available **HD** resolution (1366x768) display provides crisp, bright image on-screen and is easy to position for clear viewing.

Latest processors from Intel® handle today's software easily and provide zippy, responsive performance whether you're surfing the web, writing a term paper, editing videos or doing web chats.

Waves MaxxAudio® provides audio controls and tuning that provides a soundstage that adds dimensionality to music and videos.

HDMI allows you to connect your laptop to an external monitor or big-screen TV to view content in up to FHD / 1080p resolution for stunning detail.

USB 3.0 port transfers files up to 10x faster than USB 2.0 ports, saving you time on large file transfers between your laptop and external hard drives or networks.

SD media card reader allows you to insert a media card into the laptop's card reader slot to transfer files from your camera or video recorder.

Big hard drives (up to 1 TB depending on regional availability) allow you to store your content with less worry about running out of hard drive space.

Up to **8GB of memory** (up to 4GB for 3451/3551) is great for multi-taskers who keep several applications open at the same time & switch between them. Your laptop stays quick & responsive, unlike older systems with less memory that bog down and crash.

Ideal for

Consumers who want features and technology they won't outgrow, in a well-designed, versatile laptop that doesn't cost a ton.

The Inspiron 14 fits people who carry their systems often, prefer a small design to slip into a bag easily & need long battery life.

The Inspiron 15 is great for multi-user households where the laptop is shared by different users and needs (e.g., parents doing the budget / work projects vs. kids doing homework / watching a movie on long trip)

Designed for the real world — because that's where life happens.

We want you to love your new PC for years to come. That's why we test Inspiron laptops for reliability not just in the places where you expect it, but for the open road ahead.

1. Turn up the heat: From locker rooms to locked cars, we test Inspiron laptops for survival in harsh short-term heat conditions of up to 65°C / 149°F.
2. Everything hinges on it: We test Inspiron laptop hinges to ensure they still feel tight, even after opening and closing the lid 20,000 times.
3. Keys to success: We test commonly-used keys for 10 million keystrokes and touch pad buttons 1 million times with no failure. So go ahead, finish your novel.
4. Buttoned up: No matter what you set your power and multimedia buttons to do, we've tested them to survive up to 40,000 pushes with no problems.
5. Twist and turn: Call us excessive, but after twisting an Inspiron laptop's base and lid more than 25,000 times, we can assure you the parts inside are well-protected.
6. Always a good fit: You'll probably never need to remove and reinstall your Inspiron's battery 30 times, but you can rest easy knowing that we've tested even that.
