XPS brand

XPS products are designed to be the best, with cutting-edge technologies, exceptional build quality, unique materials and powerful features. XPS brings together the most elegant designs and premium experiences to enhance your work and personal success. This combination ultimately results in beautifully crafted products with no compromises.

Premium design — XPS laptops are thoughtfully designed for performance and function. Every material is selected to enhance performance and every design decision made is made with purpose. XPS laptops are precision crafted from authentic materials like machined aluminum, carbon fiber, woven glass fiber and hardened Corning® Gorilla® Glass for incredible durability and a superior experience.

Ultimate experience — While XPS laptops are thin and beautifully crafted, they also provide the most uncompromised experiences for work and play. XPS laptops have all of the performance you need, packed into smaller, thinner and more innovative designs. Each XPS product has a specific customer and usage in mind and a high performance standard to meet their expectations. Every interaction with your laptop from best-in-class displays to a superior touchpad and keyboard experience are prioritized for usability excellence.

Innovation — Innovation starts with XPS, where cutting-edge technologies like InfinityEdge displays and groundbreaking thermal design lead the way for the most aggressive form factors. Enabling technologies, like miniscule camera design shatter boundaries, while leadership in core technologies provide the best customer experiences.

Feature overview

EXPERIENCE COLOSSAL POWER.

Our new 17-inch XPS laptop can fuel the most intensive creative projects with ease, with powerful performance, a stunning 17-inch display all in an impossibly thin laptop design. Powerful processing and graphics horsepower in such a thin form is achieved with a unique and advanced thermal design. A larger than life, color accurate display is the perfect canvas for creation while life-like 3D sound enhances the experience. Its thin design is also smallest in its class. Harness colossal power in an optimum form.

Feature overview

Powerful performance to fuel creation – our most powerful XPS laptop yet

Desktop-caliber creativity on the go: Packed with staggering performance typically only available from desktops, 10th Gen Intel® Core™ processors bring desktop-caliber creativity to your laptop. Help you capture, edit and share your photos and 4K videos faster than ever before.

Adaptive performance: Based on the latest Intel Dynamic Tuning Technology, with this predictive and adaptive engine, our laptop is actively changing the power of its CPU to optimize your specific workload, increasing performance when you need it.

Next gen content creation: A Dell XPS 17 laptop with the GeForce RTX™ 2060 features dedicated ray tracing, AI, and video hardware for next generation content creation. Dedicated ray tracing cores render beautiful scenes with accurate lighting, shadows, and reflections. Dedicated AI cores handle time-consuming, repetitive creative tasks such as video re-timing, image enhancement, color matching, face tagging, and style transfer. And dedicated video hardware enables fast, high-quality encoding and decoding for video editing and livestreaming.

Killer™ AX1650 built on Intel WiFi 6 Chipset: Featuring advanced Wi-Fi 6 technology, the Killer AX1650 is nearly 3 times as fast* as the previous generation of 80MHz 2x2 AC products. The Killer 1650 automatically detects, classifies, and prioritizes streaming video, communication, and game traffic in your system for fast, smooth online experiences.

Faster time to productivity: A built-in sensor allows you to open the lid and power up in milliseconds, no matter what power-state you are in. Plus, log in securely with a touch or a look with Windows Hello and a fingerprint reader built into the power button or with infrared camera and facial recognition.

Feature overview

Advanced thermal design

Advanced thermal design: The new XPS 17 delivers unprecedented performance (90W) in an incredibly thin (19.5mm) form factor. A unique thermal design makes it possible to cool so much power in such a thin design.

Dual Opposite Outlet fans: Available on systems with NVIDIA® graphics, Dell's development of the uniquely designed dual opposite outlet fans have resulted in multiple pending patent applications and at least one issued patent. The innovative design of the fan increases fan airflow by approximately 30% and drives cooling airflow in both directions, resulting in more airflow overall and improved skin temperatures.*

Along with these dual fans, a massive vapor chamber spans the entire width of the laptop and hidden exhaust vents in the hinge also help with airflow, while a slight ramp aids in lifting more heat out. Additionally, your system is equipped with GORE™ Thermal Insulation, which provides thermal conductivity levels lower than air in a thin, flexible format to help keep components cool.

Feature overview

Immersive best-in-class display

Pinpoint Accuracy: With up to 4K Ultra HD+ (3840 x 2400) resolution, enjoy precise detail and sharp images. See the detail of every pixel in the photo without needing to zoom in or see more content while browsing the web.

True-to-life color: 100% Adobe RGB and 94% DCI P3 color gamut on UHD+ delivers saturated, bright and accurate color, especially important for creators. The display on the XPS 17 covers a wider color gamut and can show shades of color that are outside the ability of a conventional panel (sRGB), so you can see more of what you see in real life.

Bright view: The touch display has a 0.65% anti-reflective coating, so you have a beautiful glossy screen without the glare for working outside or in bright indoor light. With 500-nit brightness and wide 178-degree viewing, your view is spectacular from any angle.

Entertainment in spectacular HDR: The 4K UHD+ VESA certified DisplayHDR™ 400 panel enables over 16 million colors, so you see more of what you see in real life. Both panels are Dolby Vision™ certified. That means that whatever HDR content you are viewing will have more depth and color range than a standard SDR display. Colors will pop, brights are brighter and darks are darker.

Reduces harmful blue light and maintains vivid color: The Eyesafe® display intelligently manages light energy at the source – selectively reducing harmful blue light and dispersing it across the light spectrum. Our unique solution combines RGB hardware and software adjustments to more effectively protect against blue light, while maintaining vivid color integrity. Dell is the first to offer this integrated solution.

Feature overview

4-sided InfinityEdge display

Less border, more pixels: The stunning 17-inch 4-sided InfinityEdge display has the best screen-to-body ratio in its class (93.7%), making your view all big, beautiful screen. The 16:10 aspect ratio is larger and designed to enable more productivity.

Smallest 17-inch on the planet: Like many XPS laptops, we've cleverly engineered a larger screen in a smaller size, making this XPS a 17 laptop in the size of a 15-inch. In fact, it is smaller than 48% of all 15-inch laptops on the market, too.*

Feature overview

Highlighting the essential

New modern design: The new XPS 17 is a new modern design for XPS. By maximizing experiential elements – such as a large display, an large keycaps and a massive touchpad – the design puts a focus on elevating the essential.

More pixels, more screen: The 16:10 display allows for added pixels, designed to make users more productive.

Elevating the essential: The streamlined design embeds a fingerprint reader in the power button. Keycaps are large and the touchpad is an massive 151 by 90, stretching the usable area to the outer limits.

Easy to open: The twin-coil press fit hinge is designed to maximize the screen-to-body ratio and enable 4-sided InfinityEdge. The new hinge design makes it easy to open the laptop and gives the palm rest a clean look.

Feature overview

Masterfully crafted

The XPS 17 is crafted of authentic, premium materials. Everything is done with purpose and fanatically thought through. There is a truth and integrity in materials. In the end, it's more than just a single material, but the combination of all that creates a stunning and durable design.

Beautifully crafted: XPS encapsulates both power and beauty. High-end materials are meticulously chosen to balance weight, size, performance and durability. Precisely engineered parts ensure best-in-class aesthetics and workmanship.

Precision manufacturing: The XPS 17 is cut from a block of aluminum in two pieces, so it's more durable than a machine that's pieced together. 100% of an XPS enclosure is sculpted by CNC (computer numerical control) machining process. Corning® Gorilla® Glass 6 is bonded to the aluminum, and is tough, damage resistant, durable and elegant.

Diamond cut sidewalls: Gleaming, double-anodized side edges depict the pinnacle of attention to detail. The design allows for the very narrow display border, but is beautiful and resists scratches better as you plug in peripherals. The designers went through multiple trials to achieve a flawless, polished finish.

Maximum strength, minimal weight: Aerospace-inspired carbon fiber used in the design of the black palm rest allow for maximum strength and minimal weight, plus superior heat-resistance to the palm rest. Carbon fiber is used in other industries like racing and sporting, where strength and lightweight count.

Fine details: Aesthetically, less is more. The XPS logo on the base is laser cut out of a sheet of stainless steel and dropped into the machined cut outline by hand. Mics aligned with bottom screws and laser-etched regulatory details show the fanatical attention to detail.

Feature overview

Incredible sound

Top firing speaker grilles: A high speed laser drilled 7,622 holes to support two primary up firing speakers, plus two traditional tweeters in the base. The quad speaker design enables a more immersive audio experience and discrete Waves Nx® 3D audio experience only offered before through headphones

Discrete surround sound: With Waves Nx® Speakers, sound leaps out of your laptop speakers and expands into an immersive 3D soundscape. Any music, movie, or game plays with depth and width that seems to defy the laws of physics. With Nx Speakers, immersive just got bigger. The XPS 17 is the first-ever 17 laptop featuring Waves Nx® 3D audio for speakers tuned by multi-Grammy Award® winning producer, Jack Joseph Puig.

Crystal clear communication: Top-mounted mics provide a better audio experience in Skype conference calls with echo cancellation and noise reduction. Additionally, Waves MaxxVoice – a suite of studio-quality voice optimizations - is engineered to match the quality of face-to-face communication for clear and uninterrupted voice conferencing.

Feature overview

Built for creation

XPS Creator Edition: XPS configurations badged with Dell Creator Edition have been carefully selected for those who aspire to cultivate their digital content creation skills – whether that be in photography, graphic design, music production, or beyond.

Configuration recommendation/minimum: ≥ i5 processor, 512GB SSD and 16GB memory (discrete graphics recommended for music production, graphic design or videography).

Easily transfer images: The XPS 17 still has a full SD card slot for transferring files seamlessly from your camera to your laptop

Dependability you can bank on: Designed and validated for content creation as part of NVIDIA's RTX Studio program and backed by NVIDIA Studio drivers, Dell XPS 17 has undergone extensive testing with leading creative applications to deliver the performance and reliability you need so you can create at the speed of imagination.

Feature overview

Eco-wise

Saving our seas: Recognized by CES with a "2018 Best of Innovation Award," our molded trays are a step beyond recycled. Twenty-five percent of the material consists of ocean plastics collected from coastal areas, while the remaining 75% is made up of other recycled plastics.

Power efficient: XPS 17 is ENERGY STAR® certified.

Smarter materials: Free of materials like cadmium, lead, mercury and some phthalates, it's also EPEAT® Silver registered* and BFR/PVC-free*.

Recycle-friendly: 90% of the laptop's parts can be easily recycled or reused

More sustainable packaging

The new XPS 2020 packaging solution is clean, simple and more premium, enhancing the consumer unboxing experience. Accessories are removed from the bags and placed underneath the system for a curated experience. As Dell drives toward its 2030 Moonshot Goal of 100% sustainable packaging, the 2020 XPS family was focused on customer feedback to increase the ease of recyclability by eliminating foam and single use plastic bags. The gift box wrap, document folder, and accessory divider materials are made from sustainably sourced materials. More recyclable than before, this packaging qualifies for EPEAT Silver Certification.

Gift box wrap (paper), document folder, and product tray materials will be made from sustainably sourced materials

Outer shipper is a full corrugate solution making it easier to recycle. Toss the entire box in the recycling bin and forget it.

Product Tray is constructed with 25% ocean bound plastic + 75% recycled content

Bags removed from drop-in-the-box items (cables/dongles/adapters) produce less waste

The CES Innovation Awards are based upon descriptive materials submitted to the judges. CTA did not verify the accuracy of any submission or of any claims made and did not test the item to which the award was given.*
