Silicone Protection Case for Opticon OPN200x (see list of compatible scanner models)

This silicone case fully encloses the scanner, offering maximum protection for your scanner without compromising its functionality.

The anti-skid surface structure provides a good grip. The USB flap covers the connector opening when in use, making it harder for dust and dirt to get into the connector and scanner. Even though there are no openings for the beeper it still can be heard.

The large scan button is covered and feels natural to operate as the design follows the scanners' contours. Also the bright LED is still visible as well. Below the large scan button a little raised bubble enables easy access to the small 'erase' button.

SPC-2 shown with OPN-2001 (scanner NOT included)
