

Kaspersky® Total Security for Business

Ready
for GDPR

Kaspersky Total Security for Business is our ultimate security solution. Because its Next Generation technologies protect more of your infrastructure, you can block threats and filter emails & web traffic either centrally or at endpoints. So it's easy to tailor your security and manage performance right across your IT estate, including your legacy systems. Powerful controls add extra protection – and every function is managed from a single console.

The protection and management capabilities you need

Kaspersky Lab has built powerful enterprise-class features into the progressive tiers of our products. We've made sure that the technology is uncomplicated and flexible enough for any-sized business to use.

Which tier is right for you?

- SELECT
- ADVANCED
- TOTAL

Multiple protection layers for

- Windows, Linux and Mac
- Windows and Linux servers
- Windows Server containers
- Android and other mobile devices
- Removable storage
- Mail servers
- Web gateways

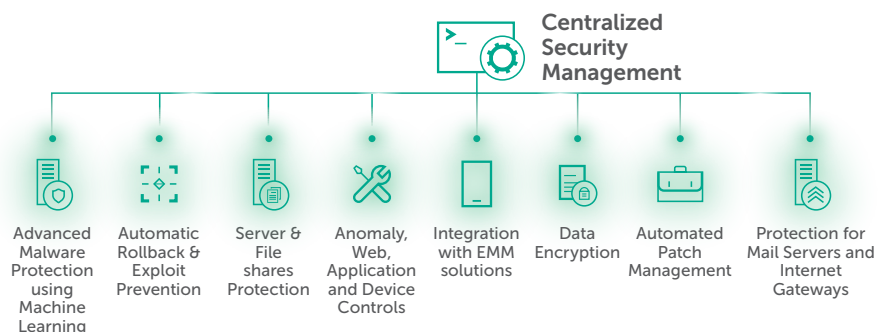

Unparalleled defense against

- Software exploits
- Ransomware
- Mobile malware
- Unknown threats
- Fileless threats
- PowerShell & script-based attacks
- Web threats
- Email-distributed threats
- Phishing attacks
- Spam

Features included

- Anti-Malware next level
- Vulnerability Management
- Security Policy Adviser
- Dynamic Machine learning
- AMSI support new
- Encrypted traffic scanning new
- Process isolation
- Exploit Prevention and Rollback
- Firewall and OS Firewall management
- Cloud-assisted protection
- Integrated EDR agent
- Adaptive Anomaly Control
- Application, Web and Device Controls
- Server and containers protection next level
- Protection for terminal servers
- Windows Linux subsystem support new
- Mobile Threat Defense next level
- OS encryption management
- System configuration & deployment
- Patch Management next level
- Reporting
- Anti-spam
- Traffic protection next level
- Internet gateway protection next level
- Mail Server security next level

Our ultimate security for every aspect of your business

One management console

From the 'single pane of glass' management console, administrators can view and manage the entire security landscape and apply your chosen security policies to every endpoint in your business. This helps deploy security rapidly and with minimum interruption or fuss, using the wide range of preconfigured scenarios.

Agile, adaptive security

The product is designed to work within any IT environment, adapting to your business needs now – and in the future – while keeping day-to-day IT running smoothly. It employs a full stack of proven and Next Gen technologies to prevent detected attacks; built-in sensors and integration with Endpoint Detection and Response (EDR) enable the discovery of even the most obscure, sophisticated cyberattacks.

A single product – transparent costs

With multiple security technologies built into a single product, there are no hidden costs. One product means one license – and all you need to protect your IT estate.

Cybersecurity you can trust

Businesses require neutrality and data sovereignty – our product scans, but does not harvest information. Statistics data is processed in Switzerland for assured geopolitical neutrality.

Key features

Cloud-enabled endpoint controls

Unique Anomaly and Application Controls

Adaptive Anomaly Control, which automatically uplifts security levels to the highest level appropriate to each role in the organization, is complemented by enterprise-grade Application Control and an always-up-to-date whitelisting database.

Device Control, Host Intrusion Prevention and more...

Mobile Threat Defense features

Innovative anti-malware technologies

Combining AI-based, proactive and cloud-assisted detection with real-time protection. Web protection, on-demand and scheduled scans all increase security.

Integration with EMM systems and more...

Endpoint and server protection features

Exploit Prevention

Prevents malware executing and exploiting software or OS vulnerabilities, delivering an extra layer of protection against unknown, zero-day threats.

Behavioral Detection and Automatic Rollback

Identifies and protects against advanced threats, including ransomware, fileless attacks and admin account takeovers. Behavior Detection blocks attacks, while Automatic Rollback reverses any changes already made.

Protection against encryption for shared folders

A unique anti-cryptor mechanism can block the encryption of files on shared resources conducted by a malicious process running on another machine on the same network.

Protection for containers and terminal servers and more...

System, vulnerabilities and patch management

Patch management

Advanced in-depth scanning for vulnerabilities is complemented by the automated distribution of patches.

OS and software deployment, license management and more...

Mail and web security

Traffic security

Our next-generation security technologies filter traffic flowing through gateways or external systems supporting the ICAP protocol, automatically blocking incoming threats before they reach your endpoints and servers.

Anti-spam

Kaspersky Lab's cloud-assisted, next-generation anti-spam detects even the most sophisticated, unknown spam with minimal loss of valuable communication due to false positives.

Added flexibility

Lets you choose where to apply mail and web filtering, on servers or PCs, so you can fine-tune your security for different systems and help maintain the performance of both new and legacy systems.

Encryption and data protection

Comprehensive encryption

The security team can centrally enforce FIPS 140.2 and Common Criteria-certified encryption – at file, disk or device-level – and manage native encryption tools such as Microsoft BitLocker and macOS FileVault.

HIPS, integrated policies for encryption & device control and more...

Support and Professional Services

Professional help is available whenever you need it. Operating in more than 200 countries, from 34 offices worldwide, we have you covered 24/7/365. Take advantage of our Premium Support packages (MSA), or call on our Professional Services to ensure that you derive maximum benefit and ROI from your Kaspersky Lab security installation.
